# Applied Mechanics Reviews REVIEW ARTICLES SINCE 1985 BY RESEARCH AREA

### I. FOUNDATIONS AND BASIC METHODS

Hidden (a)symmetries of elastic and plastic bifurcation. GW Hunt. AMR 39(8) 1165-1186 (Aug 1986). Reprint No AMR010 \$10

Boundary element methods in dynamic analysis. DE Beskos. AMR 40(1) 1-23 (Jan 1987). Reprint No AMR015 \$10

On some developments in direct methods of the calculus of variations. HHE Leipholz. AMR 40(10) 1379-1392 (Oct 1987) Reprint No AMR024 \$8

Approaches to the automatic generation and control of finite element meshes.

MS Shephard. AMR 41(4) 169-185 (Apr 1988) Reprint No AMR035 \$12.50

Finite element methods in probabilistic structural analysis: A selective review. H Benaroya and M Rehak. AMR 41(5) 201-213 (May 1988) Reprint No AMR037 \$11

Continuum modeling for repetitive lattice structures. AK Noor. AMR 41(7) 285-296 (Jul 1988) Reprint No AMR039 \$9.50

Mechanics and finite elements of shells. G Wempner. AMR 42(5) 129-142. (May 1989) Reprint No AMR055 \$11

Engineering analysis via symbolic computation. Al Beltzer. AMR 43(6) 119-127 (Jun 1990) Reprint No AMR071 \$9.50

Simulation of stochastic processes by spectral representation. M Shinozuka and G Deodatis. AMR 44(4) 191-204 (Apr 1991) Reprint No AMR094 \$16 Bibliography of books and monographs on finite element technology. AK

Noor. AMR 44(6) 307-317 (Jun 1991) Reprint No AMR098 \$14

Multiphase porcelastic finite element models for soft tissue structures. B R

Multiphase poroelastic finite element models for soft tissue structures. B R Simon. AMR 45(6) 191-218 (Jun 1992) Reprint No AMR114 \$22

Recent advances and applications of reduction methods. Ahmed K Noor. AMR 47(5) 125-146 (May 1994) Reprint No AMR143 \$20.

R:gularization techniques applied to boundary element methods. M Tanaka, V Sladek, and J Sladek. AMR 47(10), 457-499 (Oct 1994) Reprint No AMR153 \$30.

Theory of representations for tensor functions: A unified invariant approach to constitutive equations. Q-S Zheng. AMR 47(11), 545-587 (Nov 1994) Reprint No AMR155 \$30.

R-functions in boundary value problems in mechanics. VL Rvachev and TI Sheiko. AMR 48(4) 151-188 (Apr 1995) Reprint No AMR161 \$28.

Material forces: Concepts and applications. GA Maugin. AMR 48(5) 213-245 (May 1995) Reprint No AMR 163 \$26.

Mechanics of swelling. Special Issue edited by TK Karalis. AMR 48(10) 611-732 (Oct 1995) Reprint No AMR173 \$68.

Cosserat plasticity and plastic spin. H Lippmann. AMR48(11) Part 1, 753-762 (Nov 1995) Reprint No AMR175 \$14.

### II. DYNAMICS AND VIBRATION

Energy release protection for pressurized systems. SJ Brown. Part I AMR 38(12) 1625-1651 (1985). Reprint No. AMR002 \$11; Part II AMR 39(2) 177-201 (1986). Reprint No. AMR004 \$11

Experimental studies of longitudinal and flexural wave propagations: Annotated bibliography. MM Al-Mousawi. AMR 39(6) 853-865 (Jun 1986). Reprint No. AMR008 \$8

Inverse problems in vibration. GML Gladwell. AMR 39(7) 1013-1018 (Jul 1986). Reprint No AMR009 \$6

Flow-induced instabilities of cylindrical structures. MP Paidoussis. AMR 40(2) 163-175 (Feb 1987) Reprint No AMR016 \$8

Structural dynamics with parameter uncertainties. RA Ibrahim. AMR 40(3) 309-328 (Mar 1987) Reprint No AMR017 \$9

Stable response of nonclassically damped mechanical systems. DW Nicholson. AMR 40(6) 733-740 (Jun 1987) Reprint No AMR020 \$6
Plate vibration research in Japan. G Yamada and T Iric. AMR 40(7) 879-892

(Jul 1987) Reprint No AMR021 \$8.

Instability of dynamically loaded structures. GJ Simitses. AMR 40(10) 1403-1408 (Oct 1987) Reprint No AMR026 \$6

Nonlinear vibration analysis of plates: A review and survey of current developments. M Sathyamoorthy. AMR 40(11) 1553-1561 (Nov 1987) Reprint No AMR027 \$7

Stochastic averaging methods in random vibration. WQ Zhu. AMR 41(5) 189-199 (5/1988) Reprint No AMR036 \$9.50

Dusty shock waves. O Igra and G Ben-Dor. AMR 41(11) 379-436 (Nov 1988) Reprint No AMR044 \$27.50

Chaotic dynamics and the Newtonian legacy. JMT Thompson. AMR 42(1) 15-25 (Jan 1989) Reprint No AMR048 \$9.50 Methods of random vibration for inelastic structures. YK Wen. AMR 42(2) 39-52 (Feb 1989) Reprint No AMR050 \$11

Elastic and acoustic resonance wave scattering, GC Gaunaurd. AMR 42(6) 143-192 (Jun 1989) Reprint No AMR056 \$24.50

Causal theories of evolution and wave propagation in mathematical physics. M Kranys. AMR 42(11) Part 1, 305-322 (Nov 1989) Reprint No AMR062 \$12.50

On the dynamics of cracked rotors: A literature survey. J Wauer. AMR 43(1) 13-18 (Jan 1990) Reprint No AMR067 \$8

Modelling, control, and design of flexible structures. SS Rao, TS Pan, VB Venkayya. AMR 43(5) 99-117 (May 1990) Reprint No AMR072 \$12.50

Acoustic resonance scattering by submerged elastic shells. GC Gaunaurd and MF Werby. AMR 43(8) 171-208 (Aug 1990) Reprint No AMR075 \$20

Application of the singularity expansion method to elastic wave scattering. H Uberall, P Delsanto, J Alemar, E Rosario, and A Nagl. AMR 43(10) 235-250 (Oct 1990) Reprint No AMR074 \$16

Multibody dynamics — modeling and analysis methods. RL Huston. AMR 44(3) 109-117 (Mar 1991) Reprint No AMR089 \$14

Traveling deformation waves: A tutorial review (translation). Al Dobrolyubov. AMR 44(5) 215-254 (May 1991) Reprint No AMR 079 \$28 Nonlinear dynamic response of membranes. CH Jenkins and JW Leonard.

AMR 44(7) 319-328 (Jul 1991) Reprint No AMR097 \$14

Random vibrations and fracture mechanics. Special issue edited by I Elishakoff. AMR 44(10) 399-461, Reprint No AMR 100 \$46: (i) Linearization in analysis of nonlinear stochastic systems. L Socha and TT Soong. (ii) Nonlinear random vibration: Experimental results. RA Ibrahim. (iii) Application of FEM to linear elastic fracture mechanics. L Banks-Sills.

Dynamics of periodic and near-periodic structures. Dong Li and H Benaroya. AMR 45(11) 447-460 (Nov 1992) Reprint No AMR121 \$16. Finite element analysis of aeroelasticity of plates and shells. MN Bismarck-Nasr. AMR 45(12) 461-482 (Dec 1992) Reprint No AMR122 \$20.

Vibrations of planar curved beams, rings, and arches. P Chidamparam and AW Leissa. AMR 46(9) 467-483 (Sep 1993) Reprint No AMR132 \$20.

Mechanics of contact impact. Edited by M Okrouhlik. AMR 47(2) 33-99 (Feb 1994) Reprint No AMR 140 \$44.

Plezoelectricity and its use in disturbance sensing and control of flexible structures: A survey. SS Rao and M Sunar. AMR 47(4) 113-123 (Apr 1994) Reprint No AMR 142 \$14.

Recent advances and applications of reduction methods. Ahmed K Noor. AMR 47(5) 125-146 (May 1994) Reprint No AMR 143 \$20.

Friction-induced vibration. Special issue edited by RA Ibrahim and E Rivin. AMR 47(7), 207-305 (Jul 1994) Reprint No AMR147 \$65.

Review of three dimensional dynamic analyses of circular cylinders and cylindrical shells. KP Soldatos. AMR 47(10), 501-516 (Oct 1994) Reprint No AMR153 \$16.

Impact on laminated composites: Recent advances. S Abrate. AMR 47(11), 517-544 (Nov 1994) Reprint No AMR154 \$22.

Ray method for solving dynamic problems connected with propagation of wave surfaces of strong and weak discontinuities. YA Rossikhin and MV Shitikova. AMR 48(1), 1-39 (Jan 1995) Reprint No AMR158 \$30.

Synchronization and chaotization in interacting dynamical systems. II Blekhman, PS Landa, and MG Rosenblum. AMR 48(11) Part 1, 733-752 (Nov 1995) Reprint No AMR174 \$18.

Removal, suppression, and control of chaos by nonlinear design. JF Lindner and WL Ditto. AMR48(12) Part 1, 795-808, (Dec 1995) Reprint No AMR179 \$16.

Random vibration of structures: A personal perspective. I Elishakoff. AMR48(12) Part 1, 809-825, (Dec 1995) Reprint No AMR180 \$18.

### III. AUTOMATIC CONTROL

Manufacturing science and technology (7 articles) PH Francis (ed). AMR 39(9) 1323-1372 (Sep 1986). Reprint No AMR011 \$17

Applied mechanics problems in industry (5 articles) RC Benson (ed). AMR 39(11) 1663-1705 (Nov 1986) Reprint No AMR013 \$15

Composite laminate components for robotic and machine systems: Research issues in design. BS Thompson. AMR 40(11) 1545-1552 (Nov 1987) Reprint No AMR026(a) \$6

Inverse design and optimization in engineering (6 articles) GS Dulikravich (ed). AMR 41(6) 215-280 (Jun 1988) Reprint No AMR038 \$30.50

Optimal structural design under creep conditions. M Zyczkowski. AMR 41(12) 453-461 (Dec 1988) Reprint No AMR046 \$9.50

- Optimal structural design in the USSR. MI Reitman. AMR 42(2) 27-37 (Feb 1989) Reprint No AMR049 \$9.50
- Optimization in the design and control of robotic manipulators. SS Rao and PK Bhatti. AMR 42(4) 117-127 (Apr 1989) Reprint No AMR054 \$11
- Predicting the autonomous behaviour of simple nonlinear feedback systems.

  DP Atherton. AMR 43(10) 251-260 (Oct 1990) Reprint No AMR081 \$14
- Heat-transfer control: Principal focus on Japanese Research. Toshio Aihara. AMR 45(4) 129-153 (Apr 1992) Reprint No AMR109 \$16
- Plezoelectricity and its use in disturbance sensing and control of flexible structures: A survey. SS Rao and M Sunar. AMR 47(4) 113-123 (Apr 1994) Reprint No AMR142 \$14.
- Removal, suppression, and control of chaos by nonlinear design. JF Lindner and WL Ditto. AMR48(12) Part 1. 795-808, Reprint No AMR179 \$16.

### IV. MECHANICS OF SOLIDS

- Research trends in solid mechanics. JR Rice, et al. AMR 38(10) 1247-1308 (Oct 1985). Avail. as Reprint No. 100198 \$10
- Reflections on the theory of elastic plates. E Reissner. AMR 38(11) 1453-1464 (Nov 1985). Reprint No. AMR001 \$7
- Energy release protection for pressurized systems. SJ Brown. Part I AMR 38(12) 1625-1651 (1985). Reprint No. AMR002 \$11; Part II AMR 39(2) 177-201 (1986). Reprint No. AMR004 \$11
- Thermoelasticity with second sound. DS Chandrasekhariah. AMR 39(3) 355-376 (Mar 1986). Reprint No. AMR005 \$10
- Mechanics of distributed cracking. ZP Bazant. AMR 39(5) 675-705 (May 1986). Reprint No. AMR007 \$12
- Hidden (a)symmetries of elastic and plastic bifurcation. GW Hunt. AMR 39(8) 1165-1186 (Aug 1986). Reprint No AMR010 \$10
- Buckling and postbuckling of imperfect cylindrical shells. JG Simitses. AMR 39(10) 1517-1524 (Oct 1986) Reprint No AMR012 \$6
- Structural dynamics with parameter uncertainties. RA Ibrahim. AMR 40(3) 309-328 (Mar 1987) Reprint No AMR017 \$9
- Review of laminated composite plate buckling. AW Leissa. AMR 40(5) 575-591 (May 1987) Reprint No AMR019 \$9
- Plate vibration research in Japan. G Yamada and T Irie. AMR 40(7) 879-892 (Jul 1987) Reprint No AMR021 \$8
- Mechanics of "bumps" in coal mines: A discussion of violent deformations in the sides of roadways in coal seams. H Lippmann. AMR 40(8) 1033-1043 (Aug 1987) Reprint No AMR023 \$7
- Constitutive behavior and testing of structural adhesives. E Sancaktar. AMR 40(10) 1393-1402 (Oct 1987) Reprint No AMR025 \$7
- Instability of dynamically loaded structures. GJ Simitses. AMR 40(10) 1403-1408 (Oct 1987) Reprint No AMR026 \$6
- Nonlinear vibration analysis of plates: A review and survey of current developments. M Sathyamoorthy. AMR 40(11) 1553-1561 (Nov 1987) Reprint No AMR027 \$7
- Topics in finite elasticity: Hyperelasticity of rubber, elastomers, and biological tissues with examples. MF Beatty. AMR 40(12) 1699-1734 (Dec 1987) Reprint No AMR028 \$13
- Inclusion problems. T Mura. AMR 41(1) 15-20 (Jan 1988) Reprint No AMR030
- Fracture mechanics in offshore industry (6 articles) HC Rhee and MM Salama (eds). AMR 41(2) 21-109 (Feb 1988) Reprint No AMR032 \$27
- Conventional and unconventional plastic response and representation. DC Drucker. AMR 41(4) 151-167 (Apr 1988) Reprint No AMR034 \$12.50
- Finite element methods in probabilistic structural analysis: A selective review. H Benaroya and M Rehak. AMR 41(5) 201-213 (May 1988) Reprint No AMR037 \$11
- Initial value problems in viscoelasticity. WJ Hrusa, JA Nohel, and M Renardy. AMR 41(10) 371-378 (Oct 1988) Reprint No AMR043 \$8
- Geometrically nonlinear behavior of composite plates: A review. C-Y Chia. AMR 41(12) 439-451 (Dec 1988) ASME Bk No AMR045 \$9.50
- Optimal structural design under creep conditions. M Zyczkowski. AMR 41(12) 453-461 (Dec 1988) Reprint No AMR046 \$9.50
- Assessment of shear deformation theories for multilayered composite plates.

  AK Noor and WS Burton. AMR 42(1) 1-13 (Jan 1989) Reprint No AMR 047
- Optimal structural design in the USSR. MI Reitman. AMR 42(2) 27-37 (Feb 1989) Reprint No AMR049 \$9.50
- Methods of random vibration for inelastic structures. YK Wen. AMR 42(2) 39-52 (Feb 1989) Reprint No AMR050 \$11
- Ceramics for transportation engines siren or solution. PS Myers. AMR 42(3) 53-69 (Mar 1989) Reprint No AMR051 \$12.50
- A concept review of low-heat-rejection engines. JE Smith and R Churchill. AMR 42(3) 71-90 (Mar 1989) Reprint No AMR052 \$12.50
- Recent studies on the dynamic plastic behavior of structures. N Jones. AMR 42(4) 95-115 (Apr 1989) Reprint No AMR053 \$14

- Mechanics and finite elements of shells. G Wempner. AMR 42(5) 129-142. (May 1989) Reprint No AMR055 \$11
- Micromechanical analysis of composites by the method of cells. J Aboudi. AMR 42(7) 193-221 (Jul 89) Reprint No. AMR057 \$17
- Optimal topologies of structures. U Kirsch. AMR 42(8) 223-239 (Aug 1989) Reprint No AMR058 \$12.50
- Recent developments concerning Saint-Venants principle. CO Horgan. AMR 42(11) Part 1, 295-303 (Nov 1989) Reprint No AMR061 \$9.50
- On the dynamics of cracked rotors: A literature survey. J Wauer. AMR 43(1) 13-18 (Jan 1990) Reprint No AMR067 \$8
- Theoretical study of crack-tip singularity fields in China. KC Hwang. AMR 43(2) 19-33 (Feb 1990) Reprint No AMR068 \$11
- Assessment of computational models for multilayered composite shells. AK Noor and WS Burton. AMR 43(4) 67-97 (Apr 1990) Reprint No AMR070 \$17
- Modelling, control, and design of flexible structures. SS Rao, TS Pan, and VB Venkayya. AMR 43(5) Part 1 (Apr 1990) Reprint No AMR072 \$12.50
- Elastoviscoplastic models with relaxed configurations and internal state variables. S Cleja-Tigoiu and E Soós. AMR 43(7) 131-151 (Jul 1990) Reprint No AMR073 \$14
- Acoustic resonance scattering by submerged elastic shells. GC Gaunaurd and MF Werby. AMR 43(8) 171-208 (Aug 1990) Reprint No AMR075 \$20
- MF Werby. AMR 43(8) 171-208 (Aug 1990) Reprint No AMR075 \$20 Bibliography of books and surveys on shells. AK Noor. AMR 43(9) 223-234 (Sep 1990) Reprint No AMR078 \$14
- Addendum to: Bibliography of monographs and surveys on shells.

  W Pietraszkiewicz, AMR 45(6) 249-250 (Jun 1992) Reprint No AMR115 (free
- with AMR078 \$14)

  Storage tanks under earthquake loading. FG Rammerstorfer, K Scharf, and FD Fischer. AMR 43(11) 261-282 (Nov 1990) Reprint No AMR080 \$20
- Fischer. AMR 43(11) 261-282 (Nov 1990) Reprint No AMR080 \$20 Recent topics in constitutive modelling of cyclic plasticity and viscoplasticity.
- N Ohno AMR 43(11) 283-295 (Nov 1990) Reprint No AMR082 \$16
- Effect of loading sequence on the fatigue life of notched specimens made from steel and aluminum alloys. O Buxbaum, H Klätschke, H Oppermann. AMR 44(1) 27-35 (Jan 1991) Reprint No AMR086 \$14
- Random heterogenous media: Microstructure and improved bounds on effective properties. S Torquato. AMR 44(2) 37-76 (Feb 1991) Reprint No AMR087 528
- Influence of stress state on the failure behavior of cracked components made of steel. H Clausmeyer, K Kussmaul, and E Roos. AMR 44(2) 77-92 (Feb 1991) Reprint No AMR090 \$16
- 1991) Reprint No AMR090 \$16 Impact on laminated composite materials. S Abrate. AMR 44(4) 155-190 (Apr 1991) Reprint No AMR091 \$26
- Simulation of stochastic processes by spectral representation. M Shinozuka and G Deodatis. AMR 44(4) 191-204 (Apr 1991) Reprint No AMR094 \$16
- Bibliography of books and monographs on finite element technology. AK Noor. AMR 44(6) 307-317 (Jun 1991) Reprint No AMR098 \$14
- Nonlinear dynamic response of membranes. CH Jenkins and JW Leonard. AMR 44(7) 319-328 (Jul 1991) Reprint No AMR097 \$14
- Random vibrations and fracture mechanics. Special issue edited by I Elishakoff. AMR 44(10) 399-461, Reprint No AMR 100 \$46: (i) Linearization in analysis of nonlinear stochastic systems. L Socha and TT Soong. (ii) Nonlinear random vibration: Experimental results. RA Ibrahim. (iii)
- Application of FEM to linear elastic fracture mechanics. L Banks-Sills. Biomimetics: Advancing man-made materials through guidance from nature. AV Srinivasan, GK Haritos, and FL Hedberg. AMR 44(11) Part 1, 463-482 (Nov 1991) Reprint No AMR101 \$18
- Structural and dynamic behavior of pretwisted rods and beams. A Rosen. AMR 44(12) Part 1, 483-516 (Dec 1991) Reprint No AMR102 \$26
- Material Instabilities (22nd Midwestern Mechanics Conference, Rolla MO, Oct 1991) HM Zbib, TG Shawki, RC Batra (eds). AMR 45(3) Part 2 (Mar 1992) Reprint No AMR110 \$66 (members \$33)
- Romanian sources on applied mechanics. Mihail E Popescu. AMR 45(6) 251-252 (Jun 1992) Reprint No AMR 116 no charge.
- Micromechanical modelling of quasi-brittle materials behavior. VC Li (ed), 10 articles. AMR 45(8) 261-398 (Aug 1992) Reprint No AMR118 \$60.
- Recent developments in the force method of structural analysis. A Kaveh AMR45(9) 401-418 (Sep 1992) Reprint No AMR119 \$18.
- Mathematical modeling of transport phenomena during alloy solidification.
  C Beckermann and R Viskanta. AMR 46(1) 1-28 (Jan 1993) Reprint No
  AMR 124 \$22.
- US machining and grinding research in the 20th century. R Komanduri, ME Merchant, MC Shaw. AMR 46(3) (Mar 1993) Reprint No AMR 126 \$42
- Nondestructive testing and structural condition monitoring of mechanical cables. PAA Laura. AMR 46(4) 133-138 (Apr 1993) Reprint No AMR127
- Aging of energy production and distribution systems: DOE Workshop, Rice University, Houston TX, October 11-13, 1992. Edited by MM Carroll and PD Spanos. AMR 46(5) 139-263 (May 1993) Reprint No AMR128 \$78.

Applied mechanics of a lunar base. Edited by H Benaroya. AMR 46(6) 265-358 (Jun 1993) Reprint No AMR 129 \$65.

Vibrations of planar curved beams, rings, and arches. P Chidamparam and AW Leissa. AMR 46(9) 467-483 (Sep 1993) Reprint No AMR132 \$20.

Thermal buckling of plates and shells. ER Thornton. AMR 46(10) 485-506 (Oct 1993) Reprint No AMR 133 \$20.

Bifurcation and stability in dissipative media(plasticity, friction, fracture).

Quoc Son Nguyen. AMR 47(1) Part 1, 1-31 (Jan 1994) Reprint No AMR138

Micromechanics of random media. MEET'N'93 - First Joint ASCE-ASME-SES Meeting Symposium. Edited by M Ostoja-Starzewski and I Jasiuk. AMR 47(1) Part 2, 1-240 (Jan 1994) Reprint No AMR139 \$170.

Recent advances and applications of reduction methods. Ahmed K Noor. AMR 47(5) 125-146 (May 1994) Reprint No AMR143 \$20.

Theories and computational models for composite laminates. JN Reddy and DH Robbins Jr. AMR 47(6) Part 1, 147-169 (Jun 1994) Reprint No AMR 144

Simulations of plastic instabilities in solid mechanics. Yoshihiro Tomita. AMR 47(6) Part 1, 171-205 (Jun 1994) Reprint No AMR145 \$26.

Internal variable formulations of problems in elastoplasticity: Constitutive and algorithmic aspects. BD Reddy and JB Martin. AMR 47(9), 429-456 (Sept 1994) Reprint No AMR151 \$22.

Impact on laminated composites: Recent advances. S Abrate. AMR 47(11), 517-544 (Nov 1994) Reprint No AMR154 \$22.

Layout optimization of structures. GIN Rozvany, MP Bendsøe, and U Kirsch. AMR 48(2), 41-120 (Feb 1995) Reprint No AMR 159 \$48.

Material forces: Concepts and applications. GA Maugin. AMR 48(5) 213-245 (May 1995) Reprint No AMR163 \$26.

Anisotropic symmetries of linear elasticity. SC Cowin and MM Mehrabadi. AMR 48(5) 247-285 (May 1995) Reprint No AMR 164 \$28.

Cavitation in nonlinearly elastic solids: A review. CO Horgan and DA Polignone. AMR 48(8) 471-485 (Aug 1995) Reprint No AMR 170 \$16.

Mechanics of swelling. Special Issue edited by TK Karalis. AMR 48(10) 611-732 (Oct 1995) Reprint No AMR173 \$68.

Cosserat plasticity and plastic spin. H Lippmann. AMR48(11) Part 1, 753-762 (Nov 1995) Reprint No AMR175 \$14.

### V. MECHANICS OF FLUIDS

Hydrodynamics of fluidization and heat transfer: Supercomputer modeling. D Gidaspow. AMR 39(1) 1-23 (Jan 1986). Reprint No. AMR003 \$10

Boundary layer interactions with compliant coatings. M Gad-el-Hak. AMR 39(4) 511-524 (Apr 1986). Reprint No. AMR006 \$8

Flow-induced instabilities of cylindrical structures. MP Paidoussis. AMR 40(2) 163-175 (Feb 1987) Reprint No AMR016 \$8

Unsteady separation on lifting surfaces. M Gad-el-Hak. AMR 40(4) 441-453 (Apr 1987) Reprint No AMR018 \$8

Unsteady transonic aerodynamics and aeroelasticity. EH Dowell. AMR 41(8) 299-319 (Aug 1988) Reprint No AMR040 \$14

Industrial spray processes, spray drying and heat transfer. WS Janna. AMR 41(10) 365-370 (Oct 1988) Reprint No AMR042 \$8

Dusty shock waves. O Igra and G Ben-Dor. AMR 41(11) 379-436 (Nov 1988) Reprint No AMR044 \$27.50

Elastic and acoustic resonance wave scattering. GC Gaunaurd. AMR 42(6) 143-192 (Jun 1989) Reprint No AMR056 \$24.50

Flow control. M Gad-el-Hak. AMR 42(10) 261-293 (Oct 1989) Reprint No AMR060 \$18.50

Numerical algorithms for viscous flows with moving boundaries. JM Floryan and H Rasmussen. AMR 42(12) 323-341 (Dec 1989) Reprint No AMR064

Progress in gas-side fouling of heat-transfer surfaces. WJ Marner. AMR 43(3) 35-66 (Mar 1990) Reprint No AMR069 \$17

Some unanswered questions in fluid mechanics. L Trefethen, R Panton. AMR 43(8) 153-170 (Aug 1990) Reprint No AMR076 \$12.50

Lift force of delta wings. M Lee and CM Ho. AMR 43(9) 209-221 (Sep 1990) Reprint No AMR077 \$11

Rough-wall turbulent boundary layers. MR Raupach, RA Antonia, and S Rajagopalan. AMR 44(1) 1-25 (Jan 1991) Reprint No AMR084 \$22

On the structure of mixing layers and jets. FO Thomas. AMR 44(3) 119-153 (Mar 1991) Reprint No AMR088 \$26

Circular cylinder wake configurations: A flow visualization survey. M Coutanceau and JR Defaye. AMR 44(6) 255-305 (Jun 1991) Reprint No.

Topology of flow separation on 3D bodies. GT Chapman and LA Yates. AMR 44(7) 329-345 (Jul 1991) Reprint No AMR096 \$18

Hydroacoustics of transitional boundary-layer flow. GC Lauchle. AMR 44(12) Part 1, 517-531 (Dec 1991) Reprint No AMR103 \$16

Dynamics and control of coherent structures in turbulent jets. R R Mankbadi. AMR 45(6) 219-248 (Jun 1992) Reprint No AMR113 \$24

Boundary integral equations in aerodynamics. L Morino. AMR 46(8) 445-466 (Aug 1993) Reprint No AMR131 \$20.

Reynolds number effects in wall-bounded turbulent flows. M Gad-el-Hak and PR Bandyopadhyay. AMR 47(8), 307-365 (Aug 1994) Reprint No AMR148

Heat and fluid flow inside rotating channels. W-J Yang, S Fann, and JH Kim. AMR 47(8), 367-396 (Aug 1994) Reprint No AMR 149 \$22.

Solidification of pure liquids and liquid mixtures inside ducts and over external bodies. Shoichiro Fukusako and Masahiko Yamada. AMR 47(12), 589-621 (Dec 1994) Reprint No AMR156 \$26.

Numerical simulation of coherent vortices in turbulence. M Lesieur, P Comte, and O Métais. AMR48(3) 121-149 (Mar 1995) Reprint No AMR160 \$24.

Review of recent advances in the study of unsteady turbulent internal flows.

GJ Brereton and RR Mankbadi. AMR 48(4) 189-212 (Apr 1995) Reprint No

Bibliography on skin friction reduction with polymers and other boundary-layer additives. RH Nadolink and WW Haigh. AMR 48(7) 351-460 (July 1995) Reprint No AMR 168 \$62.

Interfacial instabilities in stratified shear flows

involving multiple viscous and viscoelastic fluids. Kang Ping Chen. AMR 48(11) Part 1, 763-777, (Nov 1995) Reprint No AMR176 \$16.

Nonlinear Boltzmann equation solutions and applications to fluid dynamics.

N Bellomo, P LeTallec, and B Perthame. AMR48(12) Part 1, 777-794, (Dec 1995) Reprint No AMR178 \$20.

### VI. THERMAL SCIENCES

Hydrodynamics of fluidization and heat transfer: Supercomputer modeling. D Gidaspow. AMR 39(1) 1-23 (Jan 1986). Reprint No. AMR003 \$10

Thermoelasticity with second sound. DS Chandrasekhariah. AMR 39(3) 355-376 (3/1986). Reprint No. AMR005 \$10

Thermal management of electronic equipment. W Nakayama. AMR 39(12) 1847-68 (12/1986) Reprint No AMR014 \$10

Thermophysical properties research on fluids at the technology frontier. A Nagashima. AMR 41(3) 113-128 (Mar 1988) Reprint No AMR031 \$11

Boiling heat transfer in liquid metals. I Michiyoshi. AMR 41(3) 129-149 (Mar 1988) Reprint No AMR033 \$14

Sixty-five years of extended surface technology (1922-1987). AD Kraus. AMR 41(9) 321-364 (Sep 1988) Reprint No AMR041 \$21.50

Industrial spray processes, spray drying and heat transfer. WS Janna. AMR 41(10) 365-370 (Oct 1988) Reprint No AMR042 \$8

Ceramics for transportation engines - siren or solution. PS Myers. AMR 42(3) 53-69 (Mar 1989) Reprint No AMR051 \$12.50

A concept review of low-heat-rejection engines. JE Smith and R Churchill. AMR 42(3) 71-90 (Mar 1989) Reprint No AMR052 \$12.50

Radiative transfer in dispersed media. R Viskanta and MP Mengüç. AMR

42(9) 241-259 (Sep 1989) Reprint No AMR059 \$12.50 Recent progress of Japanese research on condensation heat transfer. I

Tanasawa. AMR 43(1) 1-11(Jan 1990) Reprint No AMR066 \$9.50 Progress in gas-side fouling of heat-transfer surfaces. WJ Marner. AMR 43(3)

35-66 (Mar 1990) Reprint No AMR069 \$17

Heat transfer in superconducting films. MI Flik. AMR 44(3) 93-108 (Mar 1991) Reprint No AMR092 \$16

Review of thermal stresses. Special collection edited by RB Hetnarski, AMR 44(8-9) 347-397 (Aug-Sep 1991) Reprint No AMR099 \$36: (i) Thermally induced flexure, buckling, and vibration of plates. TR Tauchert. (ii) Thermomechanical coupling in inelastic solids. DH Allen. (iii) Domain of influence results in generalized thermoelasticity. J Ignaczak. (iv) Thermal stresses in materials with temperature-dependent properties. N Noda.

Heat-transfer control: Principal focus on Japanese Research. Toshio Aihara. AMR 45(4) 129-153 (Apr 1992) Reprint No AMR 109 \$16

Optimum dimensions of extended surfaces operating in a convective environment. A Aziz. AMR 45(5) 155-173 (May 1992) Reprint No AMR111

Overview of micro heat pipe research and development. G P Peterson. AMR 45(5) 175-189 (May 1992) Reprint No AMR112 \$16

Fluorescence thermometry. L J Dowell. AMR 45(7) 253-260 (July 1992) Reprint No AMR117 \$12.00

Mathematical modeling of transport phenomena during alloy solidification.

C Beckermann and R Viskanta. AMR 46(1) 1-28 (Jan 1993) Reprint No AMR 124 \$22.

Perturbation techniques in phase change heat transfer. A Aziz and VJ Lunardini. AMR 46(2) (Feb 1993) Reprint No AMR125 \$28.

Solid layer thermal-conductivity measurement techniques. KE Goodson and MI Flik. AMR 47(3) 101-112 (Mar 1994) Reprint No AMR141 \$14.

Heat and fluid flow inside rotating channels. W-J Yang, S Fann, and JH Kim. AMR 47(8), 367-396 (Aug 1994) Reprint No AMR 149 \$22.

Review of microscale heat transfer. AB Duncan and GP Peterson. AMR 47(9), 397-428 (Sept 1994) Reprint No AMR 150 \$24.

Some basic thermoelastic problems for nonhomogeneous structural materials. Y Tanigawa. AMR 48(6) 287-300 (June 1995) Reprint No AMR 165 \$16.

Dynamic processes in structural thermo-viscoplasticity. H Irschik and F Ziegler. AMR 48(6) 301-316 (June 1995) Reprint No AMR166 \$18.

Transient heat transfer in extended surfaces. A Aziz and AD Kraus. AMR 48(7) 317-350 (July 1995) Reprint No AMR167 \$26.

Mechanics of swelling. Special Issue edited by TK Karalis. AMR 48(10) 611-732 (Oct 1995) Reprint No AMR173 \$68.

### VII. EARTH SCIENCES

Storage tanks under earthquake loading. FG Rammerstorfer, K Scharf, FD Fischer. AMR 43(11) 261-282 (Nov 1990) Reprint No AMR080 \$20

Random heterogenous media: Microstructure and improved bounds on effective properties. S Torquato. AMR 44(2) 37-76 (Feb 1991) Reprint No AMR087 \$28

### VIII. ENERGY AND ENVIRONMENT

Mechanics of "bumps" in coal mines: A discussion of violent deformations in the sides of roadways in coal seams. H Lippmann. AMR 40(8) 1033-1043 (Aug 1987) Reprint No AMR023 \$7

Ice mechanics (5 articles) JS Chung (ed). AMR 40(9) 1191-1244 (Sep 1987) Reprint No AMR022 \$18

Fracture mechanics in offshore industry (6 articles) HC Rhee and MM Salama (eds). AMR 41(2) 21-109 (Feb 1988) Reprint No AMR032 \$27

Aging of energy production and distribution systems: DOE Workshop, Rice University, Houston TX, October 11-13, 1992. Edited by MM Carroll and PD Spanos. AMR 46(5) 139-263 (May 1993) Reprint No AMR128 \$78.

### IX. BIOENGINEERING

Signature:

Topics in finite elasticity: Hyperelasticity of rubber, elastomers, and biological tissues - with examples. MF Beatty. AMR 40(12) 1699-1734 (Dec 1987) Reprint No AMR028 \$13

Review of knee models. MS Hefzy and ES Grood. AMR 41(1) 1-14 (Jan 1988) Reprint No AMR029 \$8 Biomimetics: Advancing man-made materials through guidance from nature. AV Srinivasan, GK Haritos, and FL Hedberg. AMR 44(11) Part 1, 463-482 (Nov 1991) Reprint No AMR101 \$18

Multiphase poroelastic finite element models for soft tissue structures. B R Simon. AMR 45(6) 191-218 (Jun 1992) Reprint No AMR114 \$22.

Simple models of human movement. R McN Alexander. AMR 48(8) 461-470 (Aug 1995) Reprint No AMR 169 \$14.

Biomechanics of growth, remodeling, and morphogenesis. LA Taber. AMR 48(8) 487-545 (Aug 1995) Reprint No AMR171 \$38.

### X. GENERAL AND MISCELLANEOUS

Index to Volume 41 (1988). Reprint No AMR061 \$80 (members \$40)
Supplement to Vol 42: Mechanics Pan-America 1989 (Selected and extended papers from PACAM I, Rio, Jan 1989). AMR 42(11) Part 2 (Nov 1989)
Reprint No 800148 (soft, \$40), 800059 (hard, \$80)

Index to Volume 42 (1989). Reprint No AMR065 \$80 (members \$40) Supplement to Vol 43: Mechanics USA 1990 (Proc USNCAM-11, Tucson, May 1990). AMR 43(5) Part 2 (May 1990) Reprint No 80013X \$88

Index to Volume 43 (1990). Reprint No AMR085 \$88 (members \$44)
Supplement to Vol 44: Mechanics Pan-America 1991 (Selected and extended papers from PACAM II, Valparaiso, Chile, Jan 1991). DT Mook (ed). AMR 44(11) Part 2 (Nov 1991) Reprint No AMR106 \$88 (members \$44)

Index to Volume 44 (1991). Reprint No AMR 108 \$88 (members \$44)
Romanian sources on applied mechanics. Mihail E Popescu.

AMR 45(6) 251-252 (Jun 1992) Reprint No AMR116 no charge. Index to Volume 45 (1992). Reprint No AMR123 \$88 (members \$44)

Supplement to Vol 46: Mechanics Pan-America 1993 (Selected and extended papers from PACAM III, São Paulo, Brazil, Jan 1993). MRM Crespo da Silva and CEN Mazzilli (eds). AMR 46(11) Part 2 (Nov 1993) Reprint No AMR 134 \$88

Index to Volume 46 (1993). Reprint No AMR136 \$88 Supplement to Vol 47: Mechanics USA 1994 (Proc USNCAM-12, Seattle, June 1994). AS Kobayashi (ed). AMR 47(6) Part 2 (Jun 1994) Reprint No AMR146 \$88

Index to Volume 47 (1994). Reprint No AMR157 \$96

Supplement to Vol 48: Mechanics Pan-America 1995 (Selected and extended papers from PACAM IV, Buenos Aires, Argentina, Jan 1995). LA Godoy, SR Idelsohn, PAA Laura, and DT Mook (eds). AMR 48(11) Part 2 (Nov 1995) Reprint No AMR177 \$96

Index to Volume 48 (1995). AMR48(12) Part 2. Reprint No AMR181 \$96

### APPLIED MECHANICS REVIEWS REPRINTS

- Research trends in solid mechanics. JR Rice, et al. AMR 38(10) 1247-1308 (Oct 1985). Avail. as Reprint No. 100198 \$10
- Reflections on the theory of elastic plates. E Reissner. AMR 38(11) 1453-1464 (Nov 1985). Reprint No. AMR001 57
- Energy release protection for pressurized systems. SJ Brown. Part I AMR 38(12) 1625-1651 (1985). Reprint No. AMR002 \$11; Part II AMR 39(2) 177-201 (1986). Reprint No. AMR004 \$11
- Hydrodynamics of fluidization and heat transfer: Supercomputer m D Gidaspow. AMR 39(1) 1-23 (Jan 1986). Reprint No. AMR003 \$10
- Thermoelasticity with second sound. DS Chandrasekhariah. AMR 39(3) 355-376 (Mar 1986). Reprint No. AMR005 \$10
- Boundary layer interactions with compliant coatings. M Gad-el-Hak. AMR 39(4) 511-524 (Apr 1986). Reprint No. AMR006 \$8
- Mechanics of distributed cracking. ZP Bazant. AMR 39(5) 675-705 (May 1986). Reprint No. AMR007 \$12
- Experimental studies of longitudinal and flexural wave propagations: Annotated bibliography. MM Al-Mousawi. AMR 39(6) 853-865 (Jun 1986). Reprint No. AMR008 \$8
- Inverse problems in vibration. GML Gladwell. AMR 39(7) 1013-1018 (Jul 1986). Reprint No AMR009 \$6
- Hidden (a)symmetries of elastic and plastic bifurcation. GW Hunt. AMR 39(8) 1165-1186 (Aug 1986). Reprint No AMR010 \$10
- Manufacturing science and technology. 7 review articles by JR Dixon and CL Dym, Y Koren, PG Ranky, DK Allen and W Van Twelves, JC Ammons and LF McGinnis, HW Stoll, BS Thompson and MV Gandhi; PH Francis (ed). AMR 39(9) 1323-1372 (Sep 1986). Reprint No AMR011 \$17
- Buckling and postbuckling of imperfect cylindrical shells. JG Simitses. AMR 39(10) 1517-1524 (Oct 1986) Reprint No AMR012 \$6
- Applied mechanics problems in industry. 5 articles by DB Bogy and FE Talke, HD Hibbitt, LJ Howell, J-C Roegiers, VK Stokes; RC Benson (ed). AMR 39(11) 1663-1705 (Nov 1986) Reprint No AMR013 \$15
- Thermal management of electronic equipment. W Nakayama. AMR 39(12) 1847-1868 (Dec 1986) Reprint No AMR014 \$10
- Boundary element methods in dynamic analysis. DE Beskos. AMR 40(1) 1-23 (Jan 1987). Reprint No AMR015 \$10
- Flow-induced instabilities of cylindrical structures. MP Paidoussis. AMR 40(2) 163-175 (Feb 1987) Reprint No AMR016 \$8
- Structural dynamics with parameter uncertainties. RA Ibrahim. AMR 40(3) 309-328 (Mar 1987) Reprint No AMR017 \$9
- Unsteady separation on lifting surfaces. M Gad-el-Hak. AMR 40(4) 441-453 (Apr 1987) Reprint No AMR018 \$8
- Review of laminated composite plate buckling. AW Leissa. AMR 40(5) 575-591 (May 1987) Reprint No AMR019 \$9
- Stable response of nonclassically damped mechanical systems. DW Nicholson.
- AMR 40(6) 733-740 (Jun 1987) Reprint No AMR020 \$6 Plate vibration research in Japan. G Yamada and T Iric. AMR 40(7) 879-892 (Jul 1987) Reprint No AMR021 \$8
- Mechanics of "bumps" in coal mines: A discussion of violent deformations in the sides of roadways in coal seams. H Lippmann. AMR 40(8) 1033-1043 (Aug 1987) Reprint No AMR023 \$7
- Ice mechanics (Special Issue of 5 articles) JS Chung (ed). AMR 40(9) 1191-1244
- (Sep 1987) Reprint No AMR022 \$18 On some developments in direct methods of the calculus of variations. HHE
- Leipholz. AMR 40(10) 1379-1392 (Oct 1987) Reprint No AMR024 \$8 Constitutive behavior and testing of structural adhesives. E Sancaktar. AMR
- 40(10) 1393-1402 (Oct 1987) Reprint No AMR025 \$7 Instability of dynamically loaded structures. GJ Simitses. AMR 40(10) 1403-
- 1408 (Oct 1987) Reprint No AMR026 \$6
- Composite laminate components for robotic and machine systems: Research issues in design. BS Thompson. AMR 40(11) 1545-1552 (Nov 1987) Reprint No AMR026(a) \$6
- Nonlinear vibration analysis of plates: A review and survey of current developments. M Sathyamoorthy. AMR 40(11) 1553-1561 (Nov 1987) Reprint No AMR027 \$7
- Topics in finite elasticity: Hyperelasticity of rubber, elastomers, and biological tissues - with examples. MF Beatty. AMR 40(12) 1699-1734 (Dec 1987) Reprint No AMR028 \$13
- Review of knee models. MS Hefzy and ES Grood. AMR 41(1) 1-14 (Jan 1988) Reprint No AMR029 \$8
- Inclusion problems. T Mura. AMR 41(1) 15-20 (Jan 1988) Reprint No AMR030
- Fracture mechanics in offshore industry. 6 articles by HC Rhee and MF Kanninen; S Dharmavasan and WD Dover; I Milne; F Kirkemo; G Demofonti, A Maresca, and G. Buzzichelli; S Machida, H Yajima, M Toyosada, Y Hagiwara, and K Kajimoto; HC Rhee and MM Salama (eds). AMR 41(2) 21-109 (Feb 1988) Reprint No AMR032 \$27

- Thermophysical properties research on fluids at the technology frontier. A Nagashima. AMR 41(3) 113-128 (Mar 1988) Reprint No AMR031 \$11
- Boiling heat transfer in liquid metals. I Michiyoshi. AMR 41(3) 129-149 (Mar 1988) Reprint No AMR033 \$14
- Conventional and unconventional plastic response and representation. DC Drucker. AMR 41(4) 151-167 (Apr 1988) Reprint No AMR034 \$12.50
- Approaches to the automatic generation and control of finite element mesh. MS Shephard. AMR 41(4) 169-185 (Apr 1988) Reprint No AMR035 \$12.50
- Stochastic averaging methods in random vibration. WQ Zhu. AMR 41(5) 189-199 (May 1988) Reprint No AMR036 \$9.50
- Finite element methods in probabilistic structural analysis: A selective review. H Benaroya and M Rehak. AMR 41(5) 201-213 (May 1988) Reprint No AMR037 \$11
- Inverse design and optimization in engineering. 6 articles by JD Stanitz, H Sobieczky, A Markovsky, GN Vanderplaats, E Hensel, and GS Dulikravich (ed). AMR 41(6) 215-280 (Jun 1988) Reprint No AMR038 \$30.50
- Continuum modeling for repetitive lattice structures. AK Noor. AMR 41(7) 285-296 (Jul 1988) Reprint No AMR039 \$9.50
- Unsteady transonic aerodynamics and aeroelasticity. EH Dowell. AMR 41(8) 299-319 (Aug 1988) Reprint No AMR040 \$14
- Sixty-five years of extended surface technology (1922-1987). AD Kraus. AMR 41(9) 321-364 (Sep 1988) Reprint No AMR041 \$21.50
- Industrial spray processes, spray drying and heat transfer. WS Janna. AMR 41(10) 365-370 (Oct 1988) Reprint No AMR042 \$8
- Initial value problems in viscoelasticity. WJ Hrusa, JA Nohel, and M Renardy. AMR 41(10) 371-378 (Oct 1988) Reprint No AMR043 \$8
- Dusty shock waves. O Igra and G Ben-Dor. AMR 41(11) 379-436 (Nov 1988) Reprint No AMR044 \$27.50
- Geometrically nonlinear behavior of composite plates: A review. C-Y Chia. AMR 41(12) 439-451 (Dec 1988) Reprint No AMR045 \$9.50
- Optimal structural design under creep conditions. M Zyczkowski. AMR 41(12) 453-461 (Dec 1988) Reprint No AMR046 \$9.50
- Index to Volume 41 (1988). Reprint No AMR063 \$80 (members \$40)
- Assessment of shear deformation theories for multilayered composite plates. AK Noor and WS Burton. AMR 42(1) 1-13 (Jan 1989) Reprint No AMR047
- Chaotic dynamics and the Newtonian legacy. JMT Thompson. AMR 42(1) 15-25 (Jan 1989) Reprint No AMR048 \$9.50
- Optimal structural design in the USSR. MI Reitman. AMR 42(2) 27-37 (Feb 1989) Reprint No AMR049 \$9.50
- Methods of random vibration for inelastic structures. YK Wen. AMR 42(2) 39-52 (Feb 1989) Reprint No AMR050 \$11
- Ceramics for transportation engines siren or solution. PS Myers. AMR 42(3)
- 53-69 (Mar 1989) Reprint No AMR051 \$12.50 A concept review of low-heat-rejection engines. JE Smith and R Churchill.
- AMR 42(3) 71-90 (Mar 1989) Reprint No AMR052 \$12.50 Recent studies on the dynamic plastic behavior of structures. N Jones. AMR
- 42(4) 95-115 (Apr 1989) Reprint No AMR053 \$14 Optimization in the design and control of robotic manipulators. SS Rao and
- PK Bhatti. AMR 42(4) 117-127 (Apr 1989) Reprint No AMR054 \$11
- Mechanics and finite elements of shells. G Wempner. AMR 42(5) 129-142. (May 1989) Reprint No AMR055 \$11
- Elastic and acoustic resonance wave scattering. GC Gaunaurd. AMR 42(6) 143-192 (Jun 1989) Reprint No AMR056 \$24.50
- Micromechanical analysis of composites by the method of cells. J Aboudi. AMR 42(7) 193-221 (Jul 89) Reprint No. AMR057 \$17
- Optimal topologies of structures. U Kirsch. AMR 42(8) 223-239 (Aug 1989) Reprint No AMR058 \$12.50
- Radiative transfer in dispersed media. R Viskanta and MP Mengüç. AMR 42(9) 241-259 (Sep 1989) Reprint No AMR059 \$12.50
- Flow control. M Gad-el-Hak. AMR 42(10) 261-293 (Oct 1989) Reprint No AMR060 \$18.50
- Recent developments concerning Saint-Venant's principle. CO Horgan. AMR 42(11) Part 1, 295-304 (Nov 1989) Reprint No AMR061 \$9.50
- Causal theories of evolution and wave propagation in mathematical physics. M Kranys. AMR 42(11) Part 1, 305-322 (Nov 1989) Reprint No AMR062
- Mechanics Pan-America 1989 (Proc PACAM-1, Rio, Jan 1989). CR Steele, AW Leissa, MRM Crespo da Silva (eds). AMR 42(11) Part 2 (Nov 1989) Reprint No 800148 (soft, \$40), 800059 (hard, \$80)
- Numerical algorithms for viscous flows with moving boundaries. JM Floryan and H Rasmussen. AMR 42(12) 323-341 (Dec 1989) Reprint No AMR064 \$12.50
- Index to Volume 42 (1989). Reprint No AMR065 \$80 (members \$40)

Recent progress of Japanese research on condensation heat transfer. I Tanasawa. AMR 43(1) 1-11(Jan 1990) Reprint No AMR066 \$9.50

On the dynamics of cracked rotors: A literature survey. J Wauer. AMR 43(1) 13-18 (Jan 1990) Reprint No AMR067 \$8

Theoretical study of crack-tip singularity fields in China. KC Hwang. AMR 43(2) 19-33 (Feb 1990) Reprint No AMR068 \$11

Progress in gas-side fouling of heat-transfer surfaces. WJ Marner. AMR 43(3) 35-66 (Mar 1990) Reprint No AMR069 \$17

Assessment of computational models for multilayered composite shells. AK Noor and WS Burton. AMR 43(4) 67-97 (Apr 1990) Reprint No AMR070 \$17 Modelling, control, and design of flexible structures. SS Rao, TS Pan, VB Venkayya. AMR 43(5) 1, 99-117 (May 1990) Reprint No AMR072 \$12.50

Venkayya. AMR 43(5) 1, 99-117 (May 1990) Reprint No AMR072 \$12.50 Mechanics USA 1990 (Proc USNCAM-11, Tucson, May 1990). CF Cen (ed). AMR 43(5) Part 2 (May 1990) Reprint No 80013X \$88

Engineering analysis via symbolic computation. Al Beltzer. AMR 43(6) 119-127 (Jun 1990) Reprint No AMR071 \$9.50

Elastoviscoplastic models with relaxed configurations and internal state variables. S Cleja-Tigoiu and E Soos. AMR 43(7) 131-151 (Jul 1990) Reprint No AMR073 \$14

Some unanswered questions in fluid mechanics. L Trefethen, R Panton. AMR 43(8) 153-170 (Aug 1990) Reprint No AMR076 \$12.50

Acoustic resonance scattering by submerged elastic shells. GC Gaunaurd and MF Werby. AMR 43(8) 171-208 (Aug 1990) Reprint No AMR075 \$20

Lift force of delta wings. M Lee and C-M Ho. AMR 43(9) 209-221 (Sep 1990) Reprint No AMR077 \$11

Bibliography of books and surveys on shells. AK Noor. AMR 43(9) 223-234 (Sep 1990) Reprint No AMR078 \$14

Application of the singularity expansion method to elastic wave scattering. H Uberall, P Delsanto, J Alemar, E Rosario, and A Nagl. AMR 43(10) 235-250 (Oct 1990) Reprint No AMR074 \$16

Predicting the autonomous behaviour of simple nonlinear feedback systems.

DP Atherton. AMR 43(10) 251-260 (Oct 1990) Reprint No AMR081 \$14

Storage tanks under earthquake loading. FG Rammerstorfer, K Scharf, FD

Fischer. AMR 43(11) 261-282 (Nov 1990) Reprint No AMR080 \$20 Recent topics in constitutive modeling of cyclic plasticity and viscoplasticity.

N Ohno. AMR 43(11) 283-295 (Nov 1990) Reprint No AMR082 \$16 Vortices in motionless media. AT Winfree. AMR 43(12) 297-309 (Dec 1990) Reprint No AMR083 \$16

Index to Volume 43 (1990). Reprint No AMR085 \$88 (members \$44)

Rough-wall turbulent boundary layers. MR Raupach, RA Antonia, and S Rajagopalan. AMR 44(1) 1-25 (Jan 1991) Reprint No AMR084 \$22

Effect of loading sequence on the fatigue life of notched specimens made from steel and aluminum alloys. O Buxbaum, H Klätschke, H Oppermann. AMR 44(1) 27-35 (Jan 1991) Reprint No AMR086 \$14

Random heterogenous media: Microstructure and improved bounds on effective properties. S Torquato. AMR 44(2) 37-76 (Feb 1991) Reprint No AMR087 528

Influence of stress state on the failure behavior of cracked components made of steel. H Clausmeyer, K Kussmaul, and E Roos. AMR 44(2) 77-92 (Feb 1991) Reprint No AMR090 \$16

Heat transfer in superconducting films. MI Flik. AMR 44(3) 93-108 (Mar 1991) Reprint No AMR092 \$16

Multibody dynamics - modeling and analysis methods. RL Huston. AMR 44(3) 109-117 (Mar 1991) Reprint No AMR089 \$14

On the structure of mixing layers and jets. FO Thomas. AMR 44(3) 119-153 (Mar 1991) Reprint No AMR088 \$26

Impact on laminated composite materials. S Abrate. AMR 44(4) 155-190 (Apr 1991) Reprint No AMR091 \$26

Simulation of stochastic processes by spectral representation. M Shinozuka and G Deodatis. AMR 44(4) 191-204 (Apr 1991) Reprint No AMR094 \$16

Generalized Galerkin methods for convection dominated transport phenomena. J Donea. AMR 44(5) 205-214 (May 1991) Reprint No AMR 093 \$14

Traveling deformation waves: A tutorial review (translation). AI Dobrolyubov. AMR 44(5) 215-254 (May 1991) Reprint No AMR 079 \$28 Circular cylinder wake configurations: A flow visualization survey. M Coutanceau and JR Defaye. AMR 44(6) 255-305 (Jun 1991) Reprint No AMPROS \$24

Bibliography of books and monographs on finite element technology. AK Noor. AMR 44(6) 307-316 (Jun 1991) Reprint No AMR098 \$14

Nonlinear dynamic response of membranes. CH Jenkins and JW Leonard. AMR 44(7) 319-328 (Jul 1991) Reprint No AMR097 \$14

Topology of flow separation on 3D bodies. GT Chapman and LA Yates. AMR 44(7) 329-345 (Jul 1991) Reprint No AMR096 \$18

Review of thermal stresses. Special collection edited by RB Hetnarski. AMR 44(8-9) 347-397 (Aug-Sep 1991) Reprint No AMR099 \$36: (i) Thermally induced flexure, buckling, and vibration of plates. TR Tauchert. (ii) Thermomechanical coupling in inelastic solids. DH Allen. (iii) Domain of influence results in generalized thermoelasticity. J Ignaczak. (iv) Thermal stresses in materials with temperature-dependent properties. N Noda.

Random vibrations and fracture mechanics. Special issue edited by I
Elishakoff. AMR 44(10) 399-461, Reprint No AMR 100 \$46: (i) Linearization
in analysis of nonlinear stochastic systems. L Socha and TT Soong. (ii)
Nonlinear random vibration: Experimental results. RA Ibrahim. (iii)
Application of FEM to linear elastic fracture mechanics. L Banks-Sills.

Biomimetics: Advancing man-made materials through guidance from nature. AV Srinivasan, GK Haritos, and FL Hedberg. AMR 44(11) Part 1, 463-482 (Nov 1991) Reprint No AMR101 \$18

Mechanics Pan-America 1991 (Proc PACAM-2, Valparaiso, Chile, Jan 1991).
PA Kittl and DT Mook (eds). AMR 44(11) Part 2 (Nov 1991) Reprint No
AMR106 \$88 (members \$44)

Structural and dynamic behavior of pretwisted rods and beams. A Rosen. AMR 44(12) Part 1, 483-516 (Dec 1991) Reprint No AMR102 \$26

Hydroacoustics of transitional boundary-layer flow. GC Lauchle. AMR 44(12) Part 1, 517-531 (Dec 1991) Reprint No AMR103 \$16

Index to Volume 44 (1991). Reprint No AMR 108 \$88 (members \$44)

Stress minimum forms for elastic solids. LT Wheeler. AMR 45(1), 1-12 (Jan 1992) Reprint No AMR 107 \$14

Micromechanics of composite materials. Special collection edited by AN Guz. AMR 45(2) 13-101 (Feb 1992) Reprint No AMR 104 \$54: (1) Statics of laminated and fibrous composites with bent structures. SD Akbarov and AN Guz. (2) Dynamics of laminated and fibrous composites. AN Guz and NA Shulga. (3) Stability of fibrous composites. IY Babich and AN Guz. (4) Stability of laminated composites. AN Guz and VN Chekhov.

Microbubble drag reduction in liquid turbulent boundary layers. C Merkle and S Deutsch. AMR 45(3) Part 1, 103-127 (Mar 1992) Reprint No AMR 105 522

Material Instabilities (22nd Midwestern Mechanics Conference, Rolla MO, Oct 1991) HM Zbib, TG Shawki, RC Batra (eds). AMR 45(3) Part 2 (Mar 1992) Reprint No AMR110 \$66 (members \$33)

Heat-transfer control: Principal focus on Japanese Research. T Aihara. AMR 45(4) 129-153 (Apr 1992) Reprint No AMR109 \$16

Optimum dimensions of extended surfaces operating in a convective environment. A Aziz. AMR 45(5) 155-173 (May 1992) Reprint No AMR111 518

Overview of micro heat pipe research and development. GP Peterson. AMR 45(5) 175-189 (May 1992) Reprint No AMR112 \$16

Multiphase poroelastic finite element models for soft tissue structures. BR Simon. AMR 45(6) 191-218 (Jun 1992) Reprint No AMR114 \$22

Dynamics and control of coherent structures in turbulent jets. RR Mankbadi. AMR 45(6) 219-248 (Jun 1992) Reprint No AMR113 \$24

Addendum to: Bibliography of monographs and surveys on shells.

W Pietraszkiewicz. AMR 45(6) 249-250 (Jun 1992) Reprint No AMR115 (free with AMR078 \$14)

Romanian sources on applied mechanics. ME Popescu. AMR 45(6) 251-252 (Jun 1992) Reprint No AMR116 no charge. Fluorescence thermometry. LJ Dowell. AMR 45(7) 253-260 (Jul 1992) Reprint No AMR117 \$12.00

Micromechanical modelling of quasi-brittle materials behavior. VC Li (ed), 10 articles. AMR 45(8) 261-398 (Aug 1992) Reprint No AMR118 \$60.

Recent developments in the force method of structural analysis. A Kaveh AMR45(9) 401-418 (Sep 1992) Reprint No AMR119 \$18.

Computational models for high-temperature multi-layered composite plates and shells. AK Noor and WS Burton. AMR 45(10) 419-446 (Oct 1992) Reprint No AMR 120 \$22.

Dynamics of periodic and near-periodic structures. Dong Li and H Benaroya. AMR 45(11) 447-460 (Nov 1992) Reprint No AMR121 \$16. Finite element analysis of aeroelasticity of plates and shells. MN Bismarck-

Nasr. AMR 45(12) 461-482 (Dec 1992) Reprint No AMR122 \$20. Index to Volume 45 (1992). Reprint No AMR123 \$88 (members \$44)

Mathematical modeling of transport phenomena during alloy solidification.
C Beckermann and R Viskanta. AMR 46(1) 1-28 (Jan 1993) Reprint No
AMR124 \$22.

Perturbation techniques in phase change heat transfer. A Aziz and VJ Lunardini. AMR 46(2) (Feb 1993) Reprint No AMR125 \$28.

US machining and grinding research in the 20th century. R Komanduri, ME Merchant, MC Shaw. AMR 46(3) (Mar 1993) Reprint No AMR 126 \$42

Nondestructive testing and structural condition monitoring of mechanical cables. PAA Laura. AMR 46(4) 133-138 (Apr 1993) Reprint No AMR127

Aging of energy production and distribution systems: DOE Workshop, Rice University, Houston TX, October 11-13, 1992. Edited by MM Carroll and PD Spanos. AMR 46(5) 139-263 (May 1993) Reprint No AMR128 \$78.

Applied mechanics of a lunar base. Edited by H Benaroya. AMR 46(6) 265-358 (Jun 1993) Reprint No AMR 129 \$65.

Chaos and noise in dynamical systems. Edited by T Kapitaniak and J Brindley. AMR 46(7) 359-444 (Jul 1993) Reprint No AMR 130 \$59.

Boundary integral equations in aerodynamics. L Morino. AMR 46(8) 445-466 (Aug 1993) Reprint No AMR131 \$20

Vibrations of planar curved beams, rings, and arches. P Chidamparam and AW Leissa. AMR 46(9) 467-483 (Sep 1993) Reprint No AMR132 \$20.

Thermal buckling of plates and shells. ER Thornton. AMR 46(10) 485-506 (Oct 1993) Reprint No AMR 133 \$20.

Mechanics Pan-America 1993 (Selected and extended papers from PACAM III, São Paulo, Brazil, Jan 1993). MRM Crespo da Silva and CEN Mazzilli (eds). AMR 46(11) Part 2 (Nov 1993) Reprint No AMR134 \$88

Nonlinear waves in solids: IUTAM Symposium, University of Victoria, Victoria, BC Canada, August 15-20, 1993. JL Wegner and FR Norwood. AMR 46(12) Part 1, 507-562 (Dec 1993) Reprint No AMR 135 \$34.

Index to Volume 46 (1993). Reprint No AMR 136 \$88

Bifurcation and stability in dissipative media(plasticity, friction, fracture).

Quoc Son Nguyen. AMR 47(1) Part 1, 1-31 (Jan 1994) Reprint No AMR138 \$26.

Micromechanics of random media. MEET'N'93 - First Joint ASCE-ASME-SES Meeting Symposium. Edited by M Ostoja-Starzewski and I Jasiuk. AMR 47(1) Part 2, 1-240 (Jan 1994) Reprint No AMR 139 \$170.

Mechanics of contact impact. Edited by M Okrouhlik. AMR 47(2) 33-99 (Feb 1994) Reprint No AMR140 \$44.

Solid layer thermal-conductivity measurement techniques. KE Goodson and MI Flik. AMR 47(3) 101-112 (Mar 1994) Reprint No AMR141 \$14.

Piezoelectricity and its use in disturbance sensing and control of flexible structures: A survey. SS Rao and M Sunar. AMR 47(4) 113-123 (Apr 1994) Reprint No AMR142 \$14.

Recent advances and applications of reduction methods. Ahmed K Noor. AMR 47(5) 125-146 (May 1994) Reprint No AMR 143 \$20.

Theories and computational models for composite laminates. JN Reddy and DH Robbins Jr. AMR 47(6) Part 1, 147-169 (Jun 1994) Reprint No AMR 144 \$20.

Simulations of plastic instabilities in solid mechanics. Yoshihiro Tomita. AMR 47(6) Part 1, 171-205 (Jun 1994) Reprint No AMR145 \$26.

Mechanics USA 1994 (Proc USNCAM-12, Seattle, June 1994). AS Kobayashi (ed). AMR 47(6) Part 2 (Jun 1994) Reprint No AMR146 \$88

Friction-induced vibration. Special issue edited by RA Ibrahim and E Rivin. AMR 47(7), 207-305 (Jul 1994) Reprint No AMR147 \$65.

Reynolds number effects in wall-bounded turbulent flows. M Gad-el-Hak and PR Bandyopadhyay. AMR 47(8), 307-365 (Aug 1994) Reprint No AMR148 \$38.

Heat and fluid flow inside rotating channels. W-J Yang, S Fann, and JH Kim. AMR 47(8), 367-396 (Aug 1994) Reprint No AMR 149 \$22.

Review of microscale heat transfer. AB Duncan and GP Peterson. AMR 47(9), 397-428 (Sept 1994) Reprint No AMR 150 \$24.

Internal variable formulations of problems in elastoplasticity: Constitutive and algorithmic aspects. BD Reddy and JB Martin. AMR 47(9), 429-456 (Sept 1994) Reprint No AMR151 \$22.

Regularization techniques applied to boundary element methods. M Tanaka, V Sladek, and J Sladek. AMR 47(10), 457-499 (Oct 1994) Reprint No AMR 153 530.

Review of three dimensional dynamic analyses of circular cylinders and cylindrical shells. KP Soldatos. AMR 47(10), 501-516 (Oct 1994) Reprint No AMR 153 \$16.

Impact on laminated composites: Recent advances. S Abrate. AMR 47(11), 517-544 (Nov 1994) Reprint No AMR 154 \$22.

Theory of representations for tensor functions: A unified invariant approach to constitutive equations. Q-S Zheng. AMR 47(11), 545-587 (Nov 1994) Reprint No AMR 155 \$30.

Solidification of pure liquids and liquid mixtures inside ducts and over external bodies. Shoichiro Fukusako and Masahiko Yamada. AMR 47(12) Part 1, 589-621 (Dec 1994) Reprint No AMR156 \$26.

Index to Volume 47 (1994), Reprint No AMR 157 \$96

Ray method for solving dynamic problems connected with propagation of wave surfaces of strong and weak discontinuities. YA Rossikhin and MV Shitikova. AMR 48(1), 1-39 (Jan 1995) Reprint No AMR 158 \$30.

Layout optimization of structures. GIN Rozvany, MP Bendsee, and U Kirsch. AMR 48(2), 41-120 (Feb 1995) Reprint No AMR159 \$48.

Numerical simulation of coherent vortices in turbulence. M Lesieur, P Comte, and O Métais. AMR48(3) 121-149 (Mar 1995) Reprint No AMR160 \$24.

R-functions in boundary value problems in mechanics. VL Rvachev and TI Sheiko. AMR 48(4) 151-188 (Apr 1995) Reprint No AMR 161 \$28.

Review of recent advances in the study of unsteady turbulent internal flows.

GJ Brereton and RR Mankbadi. AMR 48(4) 189-212 (Apr 1995) Reprint No AMR 162 \$20.

Material forces: Concepts and applications. GA Maugin. AMR 48(5) 213-245 (May 1995) Reprint No AMR163 \$26.

Anisotropic symmetries of linear elasticity. SC Cowin and MM Mehrabadi. AMR 48(5) 247-285 (May 1995) Reprint No AMR 164 \$28.

Some basic thermoelastic problems for nonhomogeneous structural materials. Y Tanigawa. AMR 48(6) 287-300 (June 1995) Reprint No AMR 165 S 16.

Dynamic processes in structural thermo-viscoplasticity. H Irschik and F Ziegler. AMR 48(6) 301-316 (June 1995) Reprint No AMR166 \$18.

Transient heat transfer in extended surfaces. A Aziz and AD Kraus. AMR 48(7) 317-350 (July 1995) Reprint No AMR 167 \$26.

Bibliography on skin friction reduction with polymers and other boundarylayer additives. RH Nadolink and WW Haigh. AMR 48(7) 351-460 (July 1995) Reprint No AMR168 \$62.

Simple models of human movement. R McN Alexander. AMR 48(8) 461-470 (Aug 1995) Reprint No AMR169 \$14.

Cavitation in nonlinearly elastic solids: A review. CO Horgan and DA Polignone. AMR 48(8) 471-485 (Aug 1995) Reprint No AMR170 \$16.

Biomechanics of growth, remodeling, and morphogenesis. LA Taber. AMR 48(8) 487-545 (Aug 1995) Reprint No AMR171 \$38.

Sediment transport mechanisms in coastal environments and rivers. Special Issue edited by RD Rajaona. AMR 48(9) 547-609 (Sept 1995) Reprint No AMR172 \$40.

Mechanics of swelling. Special Issue edited by TK Karalis. AMR 48(10) 611-732 (Oct 1995) Reprint No AMR173 \$68.

Synchronization and chaotization in interacting dynamical systems. II Blekhman, PS Landa, and MG Rosenblum. AMR 48(11) Part 1, 733-752 (Nov 1995) Reprint No AMR174 \$18.

Cosserat plasticity and plastic spin. H Lippmann. AMR48(11) Part 1, 753-762 (Nov 1995) Reprint No AMR175 \$14.

Interfacial instabilities in stratified shear flows involving multiple viscous and viscoelastic fluids. Kang Ping Chen. AMR 48(11) Part 1, 763-777, (Nov 1995), Reprint No AMR176 \$16.

Mechanics Pan-America 1995 (Selected and extended papers from PACAM IV, Buenos Aires, Argentina, Jan 1995). LA Godoy, SR Idelsohn, PAA Laura, and DT Mook (eds). AMR 48(11) Part 2, (Nov 1995) Reprint No AMR 177 596

Nonlinear Boltzmann equation solutions and applications to fluid dynamics. N Bellomo, P LeTallec, and B Perthame. AMR48(12) Part 1, 777-794, (Dec 1995). Reprint No AMR178 \$20.

Removal, suppression, and control of chaos by nonlinear design. JF Lindner and WL Ditto. AMR48(12) Part 1, 795-808, (Dec 1995). Reprint No AMR179 \$16.

Random vibration of structures: A personal perspective. 1 Elishakoff. AMR48(12) Part 1,809-825, (Dec 1995). Reprint No AMR180 \$18.

Index to Volume 48 (1995). AMR48(12) Part 2, (Dec 1995). Reprint No AMR 181 \$96

### CORE JOURNALS ABSTRACTED AND INDEXED IN AMR

The list below represents the core set of journals scanned for AMR. Many additional journals are received by AMR and from time to time items from them are also selected for display in AMR. These additional journals, as well as new journals that AMR becomes aware of, are constantly reviewed as to whether they should be included in the core set. Similarly the journals in the core set are constantly reviewed as to whether they should stay in the core set. Readers are encouraged to scan the list and communicate their comments to the editor. Tell us about important journals we are missing and why they are important. We are grateful for any corrections and new information on relevant journals.

The numbers in parentheses below after the full title give the number of issues published per year (ir=irregular). Next comes the 8-digit International Standard Serial Number, and then, again in parentheses, a short form of the publisher's name and location as a further aid in identifying the journal. Bibliographic citations in AMR use the abbreviated journal titles shown in boldface.

### AMR SUBJECT CLASSIFICATION SCHEME

### I FOUNDATIONS & BASIC METHODS

### **100 CONTINUUM MECHANICS**

General theory

Constitutive theory

Thermodynamic considerations D Modeling physical phenomena

### 102 FINITE ELEMENT METHODS

General theory Structural applications Other solid mechanics

lications

G Fluid mechanics applications

J Other applications

L Solution algorithms N Element development

### **104 FINITE DIFFERENCE** METHODS

General theory Solid mechanics applications

Fluid mechanics applications

Other applications

E Algorithms, grid development

## 106 OTHER COMPUTATIONAL METHODS IN MECHANICS

Boundary element method: General

B Boundary element method: Applications C Collocation, least-square, Galerkin, & related methods

Transform methods (incl FFT)

Hybrid and other methods (inverse transforms, Pade, etc.)

F Stochastic analysis G Asymptotic and perturbation methods

Variational methods

Algorithms and software development K Computer architectures,

systems, hardware

### II DYNAMICS & VIBRATION

### 150 KINEMATICS AND DYNAMICS

General theory Kinematics of rigid bodies and particles

D Dynamics of rigid bodies and particles F Multibody and variable mass

systems Deformable body dynamics

H Stability of motion

Gyrodynamics Nonlinear dynamics (incl chaos, bifurcation, fractals)
Computational techniques

Z Experimental techniques

### 152 VIBRATIONS OF SOLIDS (BASIC)

General theory

Linear theory Crystals

Stochastic effects, incl random excitation

F Damping, decay, and control of vibrations

Y Computational techniques

Z Experimental techniques

### **154 VIBRATIONS** (STRUCTURAL ELEMENTS)

Beams, columns, rods, bars Strings, cables, chains, ropes

Rings

Springs Membranes

G Plates H Shells

Plates and shells (thick)

Discs and blades

J Discs and blades
K Rotating shafts
(critical speed, balancing)
L Frames, trusses, and arches
M Sandwich materials

Composite materials Structural elements on foundations

P Complex systems Y Computational techniques Z Experimental techniques

### 156 VIBRATIONS (STRUCTURES)

B Buildings and foundations

Towers and chimneys

Bridges Hydraulic structures Marine structures

G Vehicles (incl locomotives)

Aircraft

J Spacecraft, spacestations K Machine elements L Machine tools

Rotating machines and

turbomachinery N Damping

Absorption Computational techniques Z Experimental techniques

### **158 WAVE MOTIONS IN SOLIDS**

General theory

Rods and beams, elastic Plates and shells, elastic

Infinite and semi-infinite

elastic media Structures, elastic

Surface waves

G Nonlinear motions H Plastic, viscoplastic waves

Viscoelastic waves

J Ultrasonic propagation K Anisotropic media L Layered and nonhomogeneous media

Granular and porous media Random waves or media

Absorption Reflection, refraction, diffraction, and scattering
Computational techniques

Z Experimental techniques

### 160 IMPACT ON SOLIDS

A General theory B Dynamic Dynamic contact problems

C Explosive loading D Electromagnetic loading Hypervelocity

Spallation and fracture Computational techniques Z Experimental techniques

**162 WAVES IN** INCOMPRESSIBLE FLUIDS

A General theory C Nonlinear, finite amplitude,

and solitary waves Gravity waves (incl breaking) Capillary waves and waves in thin films

H Reflection, refraction, diffraction,

scattering, absorption
J Pipes, ducts, channels (incl water hammer, surging, etc)

Rotating flows
Stratified flows, internal waves
Computational techniques

Z Experimental techniques

## 164 WAVES IN COMPRESSIBLE FLUIDS

General theory Expansion and compression Shock, sonic boom, blast Reflection, refraction, diffraction,

scattering, absorption
Other aspects of waves in
compressible fluids Computational techniques Z Experimental techniques

### 166 SOLID FLUID INTERACTIONS

A General theory B Nonlinear theory

External flow

Internal flow (incl sloshing) Vibration of structures in fluids

Interactions of waves with flexible structures

Flexible tanks and containers

I Pipes with flowing fluids
J Turbomachine blades excitation

K Ocean structures N Flutter and flutter R Buffeting, gusts, Flutter and flutter control

R Buffeting, gusts, turbulence effects T Aeroelasticity (incl aerothermoelasticity) Computational techniques Z Experimental techniques

## 168 ASTRONAUTICS (CELESTIAL & ORBITAL MECHANICS)

General theory Celestial mechanics Orbital mechanics

Stability and control

Other topics in astronautics Computational techniques

### Z Experimental techniques

170 EXPLOSIONS AND BALLISTICS

General theory Explosion, detonation,

deflagration Guns, ballistics Other related topics

Computational techniques Z Experimental techniques

### 172 ACOUSTICS

A General theory

Sound generation by moving surfaces Sound generation by flow

Sound waves in gases Sound waves in liquids (underwater acoustics) F Sound waves in solids

G Sound waves in nonhomogeneous, porous, or random media H Reflection, refraction, diffraction,

and scattering Acoustic properties of materials J Noise control and reduction (incl active control)

Computational techniques Z Experimental techniques

### III AUTOMATIC CONTROL

### 200 SYSTEMS THEORY AND DESIGN

Controllability, observability, realizability

Stability, robustness Identification and estimation

F Sensitivity G Filtering techniques

H Design methods
I Modeling and simulation
J Adaptive and learning systems

K Large scale systems Pattern recognition M Nonlinear systems

N Discrete systems
O Distributed parameter and

delayed systems Decentralized systems

Q Stochastic or fuzzy systems Y Computational techniques Z Experimental systems analysis

### 202 CONTROL SYSTEMS

General theory Optimization techniques and

algorithms Nonlinear systems

Discrete systems Distributed parameter and

delayed systems
Stochastic systems
Other control systems and techniques Y Computational techniques

## 204 SYSTEMS AND CONTROL

**APPLICATIONS** 

B Guidance, navigation, motion control Control of structures and

vehicles Process control

Power systems

Fluidic systems, pneumatics Digital and numerical control systems H Control components, sensors

Instrumentation, computer hardware

K Software, expert systems, artificial intelligence M Mechatronics (computer-integrated electromechanical

systems) P Microelectromechanics,

nanotechnology
R Fault diagnosis, failure detection, and isolation Other applications Z Experimental techniques

### 206 ROBOTICS

B End effectors Actuators (prime movers)

Locomotion (mobility)

Kinematics, dynamics F Sensors and controls

### 208 MANUFACTURING

B Product and process design E Systems design, integration, and control H Management and economics

### IV MECHANICS OF SOLIDS

### 250 ELASTICITY

A General theory

B Linear theory C Nonlinear and finite deformation problems D Three-dimensional problems

E Stress concentrations and singularities Elastic imperfections

(dislocations, etc)
G Variational and energy methods
H Contact problems and inclusions
I Anisotropic media

J Nonhomogeneous media K Residual stresses Y Computational techniques

#### **252 VISCOELASTICITY**

A General theory

B Linear theory C Nonlinear and finite deformation problems

F Creep G Stress relaxation

H Contact problems, inclusions, and other mechanisms Material characterization

K Anisotropic or nonhomogeneous

Computational techniques Z Experimental techniques

### 254 PLASTICITY AND VISCOPLASTICITY

A General theory C Nonlinear and finite

deformation problems

D Stress concentrations and singularities

Contact problems and inclusions Material characterization

F Material Characteristics
G Work hardening
H Cyclic and variable loading
I Visco- and elasto-plastic media

K Anisotropic and nonhomogeneous media Residual stress

M Physical theory (dislocations)
Y Computational techniques
Z Experimental techniques

#### 256 COMPOSITE MATERIAL MECHANICS

General theory Particulate media, incl cements Carbon fiber reinforced media
Other fiber reinforced media

Layered media Micromechanics

J Micromechanics
L Macroscopic characterization
N Dynamic behavior
Q Structural applications
T Ceramics, refractories, glasses
V Plastics, elastomers, rubbers
Y Computational techniques

Z Experimental techniques

## 258 CABLES, ROPES, BEAMS,

A General theory B Nonlinear and finite deformation problems

Strings, wires, chains
Ropes, cables, and belts
Beams (bending and torsion)
Beams on foundations

H Thin walled beams Anisotropic beams Nonhomogeneous beams

Nonuniform beams Curved beams and rings

Rotating shafts
Computational techniques
Experimental techniques

## 260 PLATES, SHELLS, MEMBRANES, etc

A General theory B Nonlinear and finite

deformation theory
Plates (flexure and torsion)
Shells (membrane theory)

Shells (bending theory) Anisotropic membranes,

plates, shells G Stiffened and sandwich

plates and shells H Plates and shells on foundations I Thick plates and shells J Inflatable membranes

K Rotating discs, blades, and

Y Computational techniques Z Experimental techniques

### 262 STRUCTURAL STABILITY (BUCKLING, POSTBUCKLING)

General theory Nonlinear and finite

deformation theory Postbuckling theory Imperfection sensitivity

Columns and beams Rings and arches

G Framed structures H Plates

Shells

J Pipes and pressure vessels K Stiffened and anisotropic

structures

L Dynamic stability
M Viscoelastic and creep buckling
N Plastic and elastoplastic buckling
Y Computational techniques Z Experimental techniques

## 264 ELECTROMAGNETO SOLID MECHANICS

B Continuum theory C Magnetoelasticity
D Electroelasticity

Piezoelectricity Elastic stability in electromagnetic fields

Mechanics of superconducting materials

Computational techniques Z Experimental techniques

### 266 SOIL MECHANICS (BASIC)

A General theory B Structure and classification

Constitutive relations and

models D Pore pressure, phase movement E Mechanical properties F Expansive clays G Consolidation, settlement,

and compaction H Soil and sand liquefaction I Rheological properties
J Plasticity, viscoelasticity,
and viscoplasticity

L Frost and permafrost Y Computational techniques Z Experimental techniques

### 268 SOIL MECHANICS (APPLIED)

**B Shallow foundations** 

Deep foundation, piles Machine foundations

E Anchoring F Stability G Earth dams, embankments H Lateral earth pressures
I Excavating and tunneling

J Highways, runways, railways K Trafficability L Mechanical and chemical stabilization, incl geotextiles Y Computational techniques Z Field testing and sampling

#### 270 ROCK MECHANICS

A General theory B Mechanical properties D Elasticity, viscoelasticity,

plasticity F Anisotropy and nonhomogeneity G Failure mechanisms

Rock strengthening (bolts, etc)

J Drilling K Comminution

(blasting, grinding, etc) Excavations (tunneling, etc) L Excavations (tunneling, exc Y Computational techniques Z Experimental techniques

### 272 MATERIALS PROCESSING

B Applications of plasticity theory C Forging D Extrusion

E Rolling Drawing

G Sheet metal forming and

stamping H Machining (incl NM)

I Grinding

J Casting K High deformation rate forming Residual stresses

Wrapping, laying-up (composite material) Powder metallurgy

Rapid solidification Microprocessing (eg by laser and ion beams)

T Ceramics, refractories, glasses V Plastics, elastomers, rubbers

### 274 FRACTURE AND DAMAGE **PROCESSES**

B Crack initiation Subcritical crack propagation

Dynamic processes Fatigue characteristics of

materials F Stress or strain life analysis of

Other aspects of fatigue H Corrosion and embrittlement I Fretting, wear, and erosion

J Creep K Ablation, spallation, delamination M Micromechanisms

Stochastic aspects
Computational techniques Experimental techniques

### 276 FRACTURE AND DAMAGE MECHANICS

General theory Linear elastic fracture mechanics Nonlinear elastic fracture

problems Stress intensity factor calculations E Viscoelastic problems F Crack tip plasticity problems G Residual strength Composites

Other anisotropic and nonhomogeneous media
Crack stability and branching
Impulsive loading and impact

Dynamic crack propagation Crack arrest or retardation

W Micromechanisms Computational techniques Z Experimental techniques

### 280 MATERIALS TESTING AND STRESS ANALYSIS

B Single and combined loadings G Determination of elastic

constants

oronsams
I Repeated loading (fatigue)
Dynamic loading (impact)
Thermal loading
C Creep, relaxation, and plastic
flow testing
Hardness, abrasion, and wear

testing

Optical nondestructive testing (NDT) Acoustic NDT

**Electrical NDT** Other techniques

### 282 STRUCTURES (BASIC)

A General theory B Limit design (shakedown) C Structural optimization

Active control, smart structures Probabilistic design

F Nonlinear theory G Reliability design H Concrete (reinforced)

J Sandwich structure
J Sandwich structure
J Sandwich structure
J Sandwich structure
J Sandwich structures
J Sandwich structures
J Sandwich 
Design codes

Y Computational techniques Z Experimental techniques

### 284 STRUCTURES (GROUND)

**B** Bridges

C Dams and spillways

**D** Tunnels E Frames, trusses, and arches G Buildings

J Other ground structures

## 286 STRUCTURES (OCEAN AND COASTAL)

Coastal structures

Marine applications
Offshore (fixed platforms, etc) Offshore, mobile

Underwater structures and

### 288 STRUCTURES (MOBILE)

B Ground vehicles (incl tires)

C Ships, submarines E Airplanes F Helicopters

G Lighter than air devices I Space vehicles, satellites,

spacestations J Deployable structures

### 290 STRUCTURES (CONTAINMENT)

B Pressure vessels (reactor vessels, etc)

C Boilers Heat exchangers E Composite vessels F Wirewound vessels Reinforced concrete vessels H Vessels under external pressure

J Pressurized components K Containers (tanks, silos, bins,

### 292 FRICTION AND WEAR

Friction Adhesion Wear (unintentional)

General theory

Contact fatigue
Thermomechanical effects **G Friction materials** 

Surface effects, topography, coatings
I Wear monitoring
Y Computational techniques

Z Experimental techniques

### 294 MACHINE ELEMENTS

B Belts, chains, and cables Cams D Springs, dampers E Couplings

Gears, gear trains, drives

I Gaskets, seals, etc

J Linkages L Hydraulic and pneumatic mechanisms M Hoisting devices P Other mechanisms (incl

micromechanisms) Y Computational techniques

#### 296 MACHINE DESIGN

B Synthesis and design C Balancing D Computer aided design (CAD)

E Optimized design F Kinematics of mechanisms G Dynamics of mechanisms H Elastodynamics of mechanisms I Reliability analysis and design Y Computational techniques

### 298 FASTENING AND JOINING

B Mechanical joints C Welding, brazing, and soldering D Interfacial bonding

### V MECHANICS OF FLUIDS

#### 350 RHEOLOGY

B Continuum theory C Kinetic and statistical theory D Non-Newtonian fluids

Dynamic properties (recoil and stress relaxation)

Volume viscosity G Normal stresses (second order)

H Flow birefringence
I Colloids and suspensions

J Liquid crystals K Structured continua Chemically reactive flows

Material characterization

and models Y Computational techniques Z Experimental techniques

### 352 HYDRAULICS

A General theory B Closed conduit flow C Open channel flow (incl hydraulic jumps) D Pipe losses (friction, geometry) E Unsteady flow

F Stratified flow **G** Obstructions

H Orifices, nozzles, valves, gates
Forces on hydraulic structures
J Wave loads on structures
K Stilling basins and
other energy dissipators
L Cavitation

Erosion, scouring, sediment transport Waterways

Estuaries Coasts, beaches, harbors Properties of liquids Ice transport

Computational techniques Z Experimental techniques

### 354 INCOMPRESSIBLE FLOW

General theory Irrotational flow

Rotational (nonviscous) flow,

D Viscous flow

Three-dimensional flow Low Reynolds number (incl creeping flow) Unsteady flow

H Secondary flow I Thermal convection flow J Stratified flow and free surface flow

Rotating flow or surfaces Nonequilibrium and chemical effects

O Flow around bodies P Surface tension flow (eg in low gravity environments)

R Non-Newtonian flow

Y Computational techniques

Z Experimental techniques

#### 356 COMPRESSIBLE FLOW

A General theory B Subsonic flow Transonic flow Supersonic flow Hypersonic flow Unsteady effects, vortices Viscous effects Internal flow problems Flow around bodies K Nonequilibrium and chemical effects

Thermal effects M Rotating fluids or surfaces

R Free surface flow Computational techniques Z Experimental techniques

#### 358 RAREFIED FLOW

B Kinetic theory Transition (incl slip)

D Free molecular flow E Gas surface interaction Flow in tubes and ducts (Knudsen flow)

G Multicomponents (gas mixtures) Y Computational techniques Z Experimental techniques

#### 360 MULTIPHASE FLOWS

A General theory Mixtures of liquid or gas with solid particles (eg slurries)

Liquid-gas mixture
Liquid-vapor mixture
Liquid drop formation
Bubble dynamics

G Froth flow and spray flow H Mixtures of liquid, gas, and solid particles

Filtering Y Computational techniques Z Experimental techniques

Higher order theory

## 362 WALL LAYERS (incl BOUNDARY LAYERS)

C Laminar layers D Turbulent layers E Transition and relaminarization

Compressible and

hypersonic layers Shock wave boundary layer interaction

Hinteraction
H Three-dimensional layers
I Unsteady layers
J Thermal boundary layers
K Non-Newtonian layers
M Separation and reattachment

Suction and injection Surface roughness Rotating fluids or surfaces Heat addition and cooling

Compliant wall Drag reduction

Non-equilibrium and chemical effects

Computational techniques Z Experimental techniques

## 364 INTERNAL FLOW (PIPE, CHANNEL, COUETTE)

**B** Laminar flow C Turbulent flow

D Transition and relaminarization

Unsteady flow Nonequilibrium and chemical effects

H Creeping flow I Swirling flow J Stratified flow

Rotating fluids or surfaces Heat addition

M Non-Newtonian flow N Roughness effect O Porous walls

Obstructions Secondary flow, effects of curvature

T Suction and injection Y Computational techniques Z Experimental techniques

#### 366 INTERNAL FLOW (INLETS, NOZZLES, DIFFUSERS, CASCADES)

B Steady flow C Unsteady flow E Nonequilibrium and chemical

effects

F Swirling flow G Secondary flow

H Non-Newtonian flow Separation and reattachment K Heat addition

L Suction and injection M Obstructions N Performance

Performance and optimization Computational techniques

Z Experimental techniques

### 368 FREE SHEAR LAYERS (MIX-ING LAYERS, JETS, WAKES, CAVITIES, PLUMES)

B Laminar incompressible Laminar compressible D Turbulent incompressible

Turbulent compressible Stratification

H Rotating fluids or surfaces I Jet-solid surface interaction J Jet-flow interaction

K Heat or mass addition Nonequilibrium and chemical effects

Y Computational techniques Z Experimental techniques

### **370 FLOW STABILITY**

A General theory B Solid bounds Solid boundary (internal flow) Solid boundary (external flow)

Nonlinear theory

Non-Newtonian flow H Nonequilibrium and chemical effects

I Pendant drops J Stratified flows

K Rotating flows or surfaces M Vortices P Free surfaces and interfaces

(eg jets) Computational techniques Z Experimental techniques

### **372 TURBULENCE**

General theory

Homogeneous or isotropic turbulence
Compressibility effects
Free shear layers

G Boundary layers H Pipe and channel flow

I Stratified flows J Rotating flows or surfaces K Non-Newtonian flow

Heat and mass transfer Geophysical turbulence

O Nonequilibrium and chemical effects P Intermittency and other flow structure

Modeling of turbulence Computational techniques Z Experimental techniques

### 374 ELECTROMAGNETO FLUID

AND PLASMA DYNAMICS A General theory D Flow in magnetic fields E Flow in electric fields

Heat transfer aspects Energy conversion, propulsion Computational techniques

Z Experimental techniques

## 376 NAVAL HYDROMECHANICS

A General theory

C Ship motions, resistance, performance G Ship stability and control I Ship propulsion

N Fluid dynamics effects

Y Computational techniques Z Experimental techniques

### 378 AERODYNAMICS

B Wings and airfoils

Lifting bodies Wing body combinations

G Lift, drag, stall H Interference I Performance

J Flight path and trajectories K Stability and control L Unsteady effects M Aerodynamic loads

N Icing
O Flight tests and instrumentation Hypervelocity launchers and instrumentation

Computational techniques Z Experimental techniques

### 380 MACHINERY **FLUID DYNAMICS**

**Fundamentals** Unsteady flow

and systems stability Turbines (gas and vapors) Turbines (hydraulic)

F Propellers in liquids

G Cavitation effects H Centrifugal fans, pumps, and compressors I Axial fans, pumps, compressors J Compressibility effects K Mixed flow fans, pumps, compressors
Rotor and inducer blading
Stator vanes, inlet guide vanes,

diffuser vanes Jet pumps and compressors Q Rotary compressors & pumps (roots, gears, screws, etc) R Propellers & helicopter rotors

T Other machinery Y Computational techniques Z Experimental techniques

### **382 LUBRICATION**

A General theory
B Boundary lubrication Hydrodynamic and hydrostatic lubrication

Elastohydrodynamic lubrication Liquid lubricants

F Gas lubricants H Other lubricants

J Thermal and thermoelastic effects

K Multiphase lubricants, cavitation, surface tension

Lubrication systems
Computational techniques Z Experimental techniques

### 384 FLOW MEASUREMENTS AND VISUALIZATION

Velocity

Acceleration Force and skin friction

Pressure Density G Concentration

H Mass flow Viscosity

Flow direction, vorticity Flow visualization Laser and other optical techniques

Q Wind and water tubes and tunnels V Other problems and techniques

### VI HEAT TRANSFER

### **400 THERMODYNAMICS**

B Thermodynamics E Statistical mechanics

L Thermodynamic properties of matter

S Temperature measurement and calorimetry

### 402 ONE PHASE CONVECTION

B Forced convection (external) C Forced convection (internal)

Natural convection (external) Natural convection (enclosures)

F Thermally unstable configurations

G Combined natural and forced convection H Separated flows

I Rotating fluids or surfaces J Low density flows K High speed flows L Non-Newtonian flows

Liquid metal flows

Chemical reactions
Unsteady flows
Transport mechanisms Porous media

Computational techniques Z Experimental techniques

B Nucleate pool boiling

C Nucleate pool boiling
C Pool boiling (peak heat flux)
D Pool boiling (minimum heat flux)
E Nucleate flow boiling (external)
F Flow boiling (internal)
G Flow boiling, peak heat flux
(internal)

(internal) H Flow boiling, peak heat flux (external)

I Film boiling (pool)
J Film boiling (flow)

K Mist flows

L Transition boiling M Condensation (static vapor) N Condensation (flowing vapor)

Evaporation

Surface tension effects Transient effects Solid-fluid flows

Electric field effects Porous media

Computational techniques Z Experimental techniques

### 406 CONDUCTION

A General theory

Steady problems Transient problems

Nonlinear theory Contact resistance Anisotropic media

Porous and granular material

H Multiphase media I Phase change (freezing, melting) Y Computational techniques Z Experimental techniques

#### 408 RADIATION & COMBINED MODES

B View factors C Theory of radiative properties D Interchange among surfaces

Participating media Combined radiation and convection

Combined radiation and conduction H Combined radiation, convection,

and conduction Computational techniques

### Z Experimental techniques

#### 410 DEVICES AND SYSTEMS

B Heat exchangers (recuperator) C Heat exchangers (regenerators) D Extended surfaces

Other augumentation techniques Heat pipes

G Drying and freezing H Insulation

I Environmental conditioning and control

Cooling towers

Thermal energy storage systems N Electronic equipment

### 412 THERMOMECHANICS OF SOLIDS

A General theory B Thermoelasticity

(steady and quasi-steady)
C Thermoelasticity (transient)
D Thermoelasticity (nonlinear) Inelastic thermomechanics

Thermomagnetic and thermoelectric effects

G Thermal shock H Thermal fatigue and stability

I Thermal wave propagation J Thermofracture mechanics Thermal stresses of solids

with phase change Composite materials Computational techniques Z Experimental techniques

### **414 MASS TRANSFER**

B Convection dominated transfer C Sublimation or ablation

Diffusion

Convection with diffusion Double diffusion and other combined effects

Chemical reaction

Injection or suction Porous media

J Transient effects Y Computational techniques Z Experimental techniques

#### 416 COMBUSTION

**B** Fundamentals Ignition (thermal and

heterogeneous)
D Laminar flame propagation
E Turbulent flame propagation,

flammability
F Flame stability and stabilization
G Combustion products, exhaust emissions

H Interaction of flames and surfaces I Kinetics and mechanisms

J Unsteady combustion and combustion acoustics Supersonic combustion

L Heterogeneous and multiphase combustion M Flame radiation

Combustors and afterburners Solid fuels

Liquid fuels

Oxidation and oxidizers Flame and fire

(spread and extinction) Combustion, flame,

and fire modeling Computational techniques Z Experimental techniques

### 418 PRIME MOVERS AND PROPULSION SYSTEMS

**B** Fundamentals

Performance D Steam engines and turbines E Internal combustion, positive

displacement engines F Free piston and wave engines G Gas turbines

H Rocket motors Jet and fanjet engines

J Ramjets K Nuclear power systems L lonic, electric,

and photonic propulsion

M Working fluids N Other devices

### VII EARTH SCIENCES

### **450 MICROMERITICS**

B Geometrical properties of solid particles

Mechanical and physical properties of solid particles

D Comminution of solids E Statics of solid particles F Dynamics of solid particles

Snow motion Characteristics of packings (pressured particles)

J Mechanical and physical pro-perties of atomized liquids Z Experimental techniques

### **452 POROUS MEDIA**

B Fundamentals of fluid flow C Seepage (incl pollutants)

D Multiphase flow in porous solids

E Unsteady flow F Fluidized beds

G Elastic behavior of fluid-filled solids H Dynamics of fluid-filled solids Thermodynamics, heat transfer,

and combustion K Reservoir engineering L Flow stability M Non-Newtonian fluids Y Computational techniques

Z Experimental techniques

### **454 GEOMECHANICS**

B Geomorphology C Tectonics

D Seismology E Earthquake prediction F Heat transfer aspects

G Vulcanology H Glaciology

**Gravity** Y Computational techniques Z Explorations, measurements

### **456 EARTHQUAKE MECHANICS**

B Seismicity (rate of occurrence) C Characteristics of strong

ground motion Geological criteria Soil-structure interaction

Structural response Design criteria

Seismic hydrodynamics **Tsunamis** Simulation

Computational techniques Z Experimental methods

### 458 HYDROLOGY, OCEAN-OLOGY, METEOROLOGY

B Hydrology C Physical oceanography (currents, waves, etc) Heat transfer in H and O

Computational techniques (H and O) Experimental

techniques (H and O) Physical meteorology

Atmospheric turbulence, storms Heat transfer in the atmosphere Atmospheric boundary layer,

terrain effects Applied meteorology (engineering applications, etc)
Computational techniques

in meteorology Z Experimental techniques in meteorology

### VIII ENERGY & ENVIRONMENT

#### **500 FOSSIL FUEL SYSTEMS**

B Geophysical aspects C Mining mechanics Oil and gas drilling mechanics

Oil and gas reservoir engineering Solid fuel comminution Solid fuel conversion

to liquid or gas fuel leat transfer and combustion problems

### **502 NUCLEAR SYSTEMS**

Dynamics and vibration aspects Structural mechanics aspects

Fracture mechanics aspects Ď E Fluid mechanics aspects

F Fluid structure interactions

G Transient behavior (loss of coolant accidents, etc)

### **404 TWO PHASE CONVECTION**

H Radiation interaction on materials

### **506 SOLAR AND OTHER ENERGY SYSTEMS**

B Solar collector mechanics

B Solar collector mechanics
D Solar heat transfer
F Other solar aspects
H Geothermal energy
J Wind, ocean, & hydro energy
L Other energy systems
N Energy storage
Q Energy distribution (incl pipelines, transmission lines, etc)

### **514 ENVIRONMENTAL MECHANICS**

B Dispersion by air and water F Snow and ice mechanics H Waste management, pollution

K Other environmental problems Y Computational techniques Z Experimental techniques

### IX BIOENGINEERING

**550 BIOMECHANICS** 

B Skeletal systems, bones, joints,

ligaments
C Muscle mechanics
D Kinesiology
E Mechanical properties
of tissues and blood

of tissues and blood
F Organs
G Microbiomechanics
H Transport phenomena (diffusion)
I Fluid mechanics of circulatory
systems & other body fluids
J Brain and spinal trauma
K Shock and vibration effects
L Heat transfer aspects
M Biopropulsion
P Biomaterials

Y Computational techniques Z Experimental techniques

## 552 HUMAN FACTORS, REHAB, SPORTS, ETC

B Human factors, ergonomics, man-machine interface, safety F Rehabilitation devices and controls

K Sports mechanics

### X GENERAL & **MISCELLANEOUS**

## KEYWORD INDEX TO SUBJECT CLASSIFICATION SCHEME

The codes below, such as 252, 102C, etc. refer to the Subject Classification Scheme (pp 456-460) and summarized on the back cover.

axial fans, pumps, compressors, fluid dynamics - 380I,380K axial loading, materials testing - 280B

### Α

ablation: fracture - 274K, mass transfer ion: materials test - 2800, wear

292D

absorption:, internal friction - 152F. noise control - 172J, structural vibrations - 156P, vibration damping -152F, waves in solids - 158O, waves in fluids - 162H, 164F

acceleration:, detonation - 170C, dy-namics of particles - 150D, measure-ment in flow - 384C, accidents -

acoustic, acoustics - 172, combustion - 416J, stress analysis - 280S, materials testing - 280S, nondestructive testing - 280S

acquisition systems, data - 200Z active control: noise - 172J, structures -

actuators, robotics - 206C adaptation, functional rehabilitation -552F

adaptive systems - 200J addition of heat to fluids, free shear layers - 368K, internal flow - 364L, 366K, wall layers - 362Q

- 292C, inadhesion:, friction and wear terfacial bonding - 298C aerodynamics - 378

aeroelasticity - 166T

aerospace:, systems and control - 204C, structures - 288I

aerothermoelasticity - 166T afterburners, combustion - 416O air., dispersion by - 514B, lighter than, devices - 288G

aircraft:, dynamics - 378, structures 288E, systems and control - 204C. vibrations - 156I

airfoils, aerodynamics - 378B algorithms: computational mechanics methods - 106l, finite element methods - 102L, difference methods -104E, optimal control systems - 202B

amplitude, finite: waves in incompress ible fluids - 162C analogies - modeling - 100D,2001 anchoring of soils - 268E

anisotropic beams - 2581 anisotropic media:, elasticity - 250I, heat transfer - 406F, plasticity -254K, viscoelasticity - 252K, viscoplasticity - 254K, waves in

solids - 158K

solus - 150c; membranes, plates, and shells - 260F, rock mechanics - 270F, structures, stability - 262K arches; stability - 262F, structural mechanics - 284E, vibrations - 154L architectures (computer):, computa-tional methods - 106K, manufactur-

ing - 208E arrest of cracks in fracture - 276K artificial intelligence:, manufacturing 208E, systems and control - 204K assembly, robots - 206H astronautics - 168

asymptotic computational methods - 106G

atmospheric:, dispersion - 514B, heat transfer - 458L, turbulence - 458K,

atomized liquids; multiphase flows - 360B-H, micromeritics - 450J attitude control and stabilization, astro-

nautics - 168K ugmentation techniques, heat transfer devices - 410E automatic control - III

baffling, acoustic - 172J balancing:, rotating machinery - 154K, design of machines - 296C ballistics - 170L

ballistics, explosions - 170A,P balls in sports - 552K bars: mechanics - 258, vibrations -154R

basins (stilling), hydraulics - 352K beaches, hydraulics - 352P

bearns:, elastic waves - 158B, mechan-ics - 258, stability, buckling - 262E, vibrations - 154B

bearings, machines - 294H beds (fluidized), porous media - 452F belts:, machine elements 294B, mechanics - 258E, vibrations - 154C

BEM, boundary element methods 106A, 106B bending: beams - 258F, shells - 260E biaxial loading, materials testing -

bifurcation, nonlinear dynamics - 150K bins, container structures

bio-energy systems - 506L bioengineering - IX biomass energy - 506L biomaterials - 550P biomechanics - 550 biopropulsion - 550M

biosciences - IX birefringence of flow in rheology - 350H

blades: rotating, turbomachinery -260K, excitation - 166J, rotors and inducers, fluid dynamics - 380L, vi-

brations - 154J blast waves, compressible fluids 164D, explosions - 170A,C,P blasting, comminution:, micromeritics -450D, rock mechanics - 270K, solid

fossil fuels - 500F

blood:, mechanical properties - 550E, fluid mechanics - 550I bodies, flow around:, compressible -356l, incompressible - 354O, electromagneto/plasma - 374A

body fluids, mechanics - 5501 body forces:, motion dynamics, sports -552K, muscles - 550C, skeleton -550B, sports mechanics - 552K boilers:, containment structures - 290C,

heat transfer devices - 410K boiling, convective heat transfer - 404B-L

bolts: rocks - 2701, joints - 298B bonding, interfacial - 298D bones - 550B boom: sonic - 164D, noise control -

boundary:, element methods - 106B, layers - 362, atmospheric - 458M, turbulent - 372G, lubrication - 382B,

solid, flow stability - 370B-C brain trauma - 550J brakes, machines - 294F

branching, of cracks in fracture - 276H brazing, welding - 298C breaking of waves - 162D es: vibrations - 156D, structures -

bridges: 284B brittle coating, stress analysis - 280U bubble dynamics, in multiphase flows -360F

buckling, structural stability - 262 buffeting, solid-fluid interaction -

buildings:, structural mechanics - 284G, vibrations - 156B bunkers, containers - 290K

cables - 258, machine elements - 294B, mechanics - 258E, vibrations - 154C CAD, computer-aided design - 200H, of machines - 296D, (see also 'design")

calorimetry, thermodynamics - 400S cams, machine elements - 294C capillary waves, incompressible fluids -

carbon fiber composites - 256D cascades, internal flow - 366 casting, materials processing - 272J cavitation:, hydraulics - 352L, lubrica-tion - 382K, machinery fluid dynamics 380G

cavities, free shear layers - 368 celestial mechanics - 168D cements, composite materials mechanics - 256B

centrifugal fans, pumps, compressors -380H, 380K ceramics:, composite materials - 256T,

materials processing - 272T chains:, machine elements - 294B, mechanics - 258C, vibrations - 154C channel., internal flow - 364, open, flow - 352C, waves 162J, turbulent flow -372H

chaos, nonlinear dynamics - 150K chemical reactions in:, boundary layers - 362T, compressible flow - 356K, convective heat transfer - 402N, flow stability - 370H, free shear layers 368L, incompressible flow - 354M, internal flow - 364G, 366E, mass transfer - 414G, rheological flows - 350L, turbulence - 372O, wall layers

chemical stabilization, of soils - 2681 chimneys:, structural mechanics - 284J, vibrations - 156C

CIM, computer-integrated manufactur-ing - 208E circulatory fluid mechanics, biomechanics - 550I

classical thermodynamics - 400B classification of soils - 266B clays: rheology - 350K, soil mechanics -266F

closed conduit flow, hydraulics - 352B coastal: hydraulics - 352P, structures -

coatings:, friction and wear - 292H, stress analysis - 280U codes, structural mechanics - 282P collectors, solar - 506B collocation, computational methods -

106C colloids, rheology - 350l columns: structural , stability, buckling - 262E, vibration - 154B

combined loading, materials testing -280F

combustion - 416, in porous media -4521, internal - 418E, of fossil fuels -500H, products - 416G combustors - 416O

comminution (blasting, grinding):, mi-cromeritics - 450D, rock mechanics -270K, solid fossil fuels - 500F compaction, soil mechanics - 266G compliant wall, fluid flow- 362R components, control - 204H composites - 256, containment structures - 290E, fracture mechanics -276G, materials processing, wrap-ping, laying up - 272M, thermome chanics - 412L, vibrations - 154N

compressibility effects:, machinery fluid, dynamics - 380J, turbulence -372E compressible fluids:, flow of - 356, free shear layers, flow in,, laminar - 386C, turbulent - 368E, waves in - 164 compression waves , in compressible fluids - 164B

rs, machinery fluid dynamics - 380H-Q

computational methods and techniques (letter category "Y"):, acoustics -172Y, aerodynamics - 378Y, algo-rithms - 102L, 104E, 106I, 101F, astronautics, celestial, orbital mechanics - 168Y, asymptotic methods - 106G, ballistics - 170Y, beams - 258Y, biomechanics - 550Y, boundary element methods, (BEM) - 106A, 106B, buckling - 262Y, cables, ropes, beams, - 258Y, celestial mechanics 168Y, collocation - 106C, combus-tion - 416Y, composites - 256Y, conduction - 406Y, control systems duction - 406Y, control systems - 402Y, convection, two phase - 404Y, damage processes - 274Y, design theory - 200Y, dynamics - 150Y, earthquake mechanics - 456Y, elasticity - 250Y, electromagneto solid, mechanics - 456Y, inite difference methods, (FDM) - 104, finite element methods (FDM) - 104, finite element methods, (FEM) - 102, flow, compressible - 356Y, electromagnetofluid and , plasma - 374Y, free shear layers - 368Y, incompressible - 354Y, internal (inlets, nozzles, diffusers, casnal (inlets, nozzles, diffusers, cas-cades) - 366Y, internal (pipe, chan-nel, Couette) - 364Y, multiphase -360Y, rarified - 358Y, stability -370Y, turbulent - 372Y, wall layers 362Y, fracture processes - 274Y, fracture mechanics - 276Y, friction and wear - 292Y, geomechanics -454Y, heat transfer; conduction -466Y convection, one-phase - 402Y 406Y, convection, one-phase - 402Y, convection, two-phase - 404Y, radia-tion, combined modes - 408Y, hybrid methods, computational, me-chanics - 106E, hydraulics - 352Y, hydrology - 458E, impact on solids -160Y, inverse scattering, transform method - 106E, kinematics, dynamics - 150Y, least square method, computational mech - 106C, lubrication tational mech - 106C, lubrication - 382Y, machine design - 296Y, machinery, fluid dynamics - 380Y, mass transfer - 414Y, membranes - 260Y, meteorology - 458Y, methods other, than FEM and FDM - 106, naval hydromechanics - 376Y, oceanology - 458Y 458E, optimal control systems 202Y, ophinal mechanics - 168Y, Pade approximant - 106E, perturba-tion methods - 106G, plasticity, ecoplasticity - 254Y, plates, shells, membranes, - 260Y, porous media membranes, - 260Y, porous media - 452Y, radiation, heat transfer - 408Y, rheology - 350Y, robotics - 206Y, rock mechanics - 270Y, ropes - 258Y, shells - 260Y, software - 106I, soil mechanics, applied - 268Y, soil mechanics, basic - 266Y, solid-fluid interactions - 166Y, stochastic analysis - 106E, stanstures basic - 289Y interactions - 166Y, stochastic analysis - 106F, structures, basic - 282Y, stability (buckling) - 262Y, vibrations - 156Y, vibrations of elements - 154Y, systems theory, design - 200Y, thermomechanics of, solids - 412Y, transform methods, computational mech - 106D, paratitional methods, 106H, paratitional methods, 106H. variational methods - 106H, vibrations of solids - 152Y, vibrations of structural elements -154Y, vibrations of structures -154Y, vibrations of structures -156Y, viscoelasticity - 252Y, viscoplasticity - 254Y, wave motions in solids - 158Y, waves in , compressible fluids - 164Y, incompressible fluids - 162Y, wear -292Y

computer, algorithms:, aided design (CAD) - 200H, of machines - 296D, (see also "design"), architectures -106K, hardware, systems and control - 204I, computational, methods concentration measurement in flow -

concentrations, stress:, elasticity -

250E, plasticity, viscoplasticity -254D

concrete structures:, prestressed - 282I, reinforced - 282H, reinforced vessels - 290G

condensation, two phase convective heat transfer:, vapor flowing - 404N, static - 404M

conditioning (air), environmental -4101

conduction - 406, combined with radiation - 408G, combined with radiation and, convection - 408H conduit (closed), hydraulic flow - 352B consolidation of soils - 266G constants (elastic), materials testing -

constitutive theory- 100B constitutive relations and models, soil mechanics - 266C

ontact:, dynamic impact, solids -160B, fatigue, friction and wear 292E, fronts, waves in compressible fluids - 164D, problems and inclusions; elasticity - 250H, plasticity and, viscoplasticity - 254E, viscoelasticity - 252H, resistance, heat conduction. heat conduction - 406E

containers - 290, flexible, solid-fluid interaction - 166H, incompressible fluids in, sloshing - 166D, tanks, si-los, bins, bunkers, - 290K, vibration of, compressible fluids in - 166H containment, hazardous waste - 514H continua, structured, rheology - 350K continuum mechanics - 100, electro-magneto fluids - 374A, electromagne-to solids - 264B, plasmas - 374A,

rheology 350B control - III, active, of noise - 172J, aerodynamics of control, surfaces aerodynamics of control, an accession of the control of the contro 204G, dynamics of control surfaces, naval hydromechanics 376G, environmental conditioning, and control
- 410l, experiments -, 200Z, 202H,
384V, flutter, solid fluid interactions
- 166N, guidance, astronautics -168K, manufacturing systems - 208E, motion, vehicles - 204B, noise -172J, optimal control systems - 202, process 204D, robotics - 206F, ship maneuvers - 376G, structures - 204C, systems - 202, vehicles - 204C

controllability, systems theory - 200B convection; combined with radiation -408F, combined with radiation, and conduction - 408H, flow, incompressible - 354I, mass transfer -

414B, one phase, heat transfer - 402, two phase, heat transfer - 404, with diffusion - 414E

conversion, energy:, direct - 400B, electrohydrodynamic , (EHD) -374M, magnetohydrodynamic , (MHD) - 374M, thermonuclear -374M, fuel, solid to liquid/gas - 500G coolant (loss of), nuclear, systems accidents - 502G

cooling:, by solar systems - 506D, flow in wall, or boundary layers - 362Q, towers - 410J

corrosion - 274H Couette flow (internal)- 364 coupling lubrication - 382L couplings, machine elements - 294E crack initiation - 274B cracks, fracture mechanics - 274C, 276H-K

creep, viscoelastic - 252F, buckling - 262M, fracture processes - 274J, materials testing - 280K

creeping flow: , incompressible - 354F, internal (pipe, channel, Couette) -

critical speed of rotating shafts, vibra-tions - 154K

crystals, basic vibrations - 152C, liquid, rheology - 350J currents, physical oceanography - 458C

curvature effects, internal flow - 364R curved beams and rings, mechanics -

cutting:, lubricants - 382H, materials

processing - 272H clic loading:, materials testing -280H, plasticity, viscoplasticity -

### D

damage: mechanics - 276, processes 274

dampers, machine elements - 294D damping (internal friction):, vibrations of solids - 152F, vibrations of struc-tures - 156N

dams (earth):, soil mechanics - 268G. ground structures - 284C decay of vibrations, solids - 152F eration systems, mobile structures

- 288J decentralized systems:, systems theory - 200P, control systems - 202H deep foundations, soil mechanics 268C

deflagration, explosions - 170C deformable body, dynamics - 150G deformation, nonlinear and finite, elasdeformation, nonlinear and finite, elas-ticity - 250C, plasticity, viscoplastic-ity - 254C, viscoelasticity - 252C, cables, ropes, beams - 258B, plates, shells, membranes - 260B, structural stability, buckling - 262B deformation, high rate forming, materi-als processing - 272K delamination - 274K delawed systems: systems theory -

delayed systems:, systems theory 2000, control systems - 202H density measurement, in flow - 384F deployable structures - 288J salination - 506L

design and systems theory - 200, meth-ods - 200H, of machines (CAD) -296D

design, codes, structural - 282P, crite-ria, earthquake, mechanics - 456G, of experiments -, 200Z, 202H, 384V, machines (CAD) - 296, manufacturing systems - 208E, processes -208B, of products - 208B, of structures:, limit - 282B, probabilistic 282E, reliability - 282G

detonation, dust, vapor - 170C devices; heat transfer - 410, hoisting -294M, lighter than air - 288G, pro-pulsion - 418

diagnosis of faults - 204R difference (finite), methods - 104 differential games, control systems -

diffraction of waves:, acoustic wave 172H, in compressible fluids - 164F, in incompressible fluids - 162H, in solids - 158Q

diffuser vanes, machinery fluid dynamics - 380M diffusers, internal flow in - 366 diffusion, mass transfer - 414D, biome-chanics - 550H, combined effects -414F, with convection - 414E, double effects - 414F, turbulent - 372L

digital:, control systems - 204G direct energy conversion - 400B direction of flow, measurement and visualization - 384J

discrete systems:, systems theory -200N, control systems-202D discs: mechanics - 260K, vibrations -

dislocations:, elastic imperfections -250F, physical theory in plasticity and, viscoplasticity - 254M dispersion, environmental - 514B, tur-bulent - 372L

displacement (positive) machines or engines: machinery fluid, dynamics 380T, internal combustion - 418E displays, human factors engineering -552B

disposal, hazardous waste - 514H pators of energy in hydraulics -352K

distributed parameter systems:, systems theory - 2000, control systems -202F

distribution systems, for energy - 506Q divergence, static aeroelasticity - 166T double diffusion, mass transfer - 414F drag: aerodynamics - 378G, reduction in wall layers - 362S

drawing, materials processing - 272F drilling:, materials processing - 272H, oil and gas - 500D, rock mechanics 270J

drives, machine elements - 294G drops (liquid) formation - 360E, pen-dant, flow stability - 370I dry film lubrication - 382H drying, heat transfer devices - 410G ducts: waves in incompressible fluids -162J, rarified flow - 358F dust detonations, and explosions

dynamic:, behavior of composites 256N, contact, impact - 160B, crack propagation - 276J, fracture processe - 274D, loading:, materials testing -- 274D, loading, materials testing - 2801, structures (basic) - 282L, rheological properties - 350E, stress measurement - 2801, structural stability, buckling - 262L dynamics - II, attitude, astronautics -

168K, bodies (basic)- 150, bubbles -360F, electromagneto-fluid - 374, fluid filled solids - 452H, fluids in machinery - 380, mechanisms 296G, naval hydromechanics - , 376C-P, nonlinear - 150K, plasma - 374, robotics - 206E, soils - 266K, solid particles, micromeritics - 450F, vibra-tion - II, nuclear systems - 502B

earth, applied soil mechanics:, dams -268G, lateral pressures - 268H earth sciences - VII earthquake: prediction - 454E, mechanics - 456

tcs - 436 economics, manufacturing - 208H effectors (end) in robotics - 206B EHD, (electrohydrodynamics)- 374M elastic solids - 250, fluid filled - 452G, constants - 280G, fracture mechanics - 276B-D, stability in electromag-netic, fields - 264F, wave motions in - 158A-F. - 158A-E

elasticity - 250, rock mechanics - 270D astodynamics of mechanisms, design - 296H elastody

elastohydrodynamic, lubrication -382D

elastomers, composite materials - 256V, materials processing - 272V elastoplastic:, buckling - 262N, media, plasticity and, viscoplasticity - 254I electric:, stress analysis, NDT - 280T, fields, flow in - 374E, fields, two

phase convection - 404S, propulsion 418L, transmission lines - 506Q electroelasticity - 264D electromagnetic; loading, impact on solids - 160D, fields, elastic stability in - 264F

electromagneto solid, mechanics - 264 electromagneto-fluid, dynamics - 374 electromechanical, systems - 204M,P electronic equipment, heat transfer problems - 410N

ment (boundary) methods - , 106A,

element (finite) methods - 102 ankments, applied soil mechanics -268G

embrittlement, fracture processes -274H emissions, exhaust - 416G

enclosures, convective heat transfer in -402F end effectors, robotics - 206B

end effectors, robotics - 200B energy - VIII, conversion, direct - 400B, EHD, MHD, thermonuclear - 374M, dissipators in hydraulics - 352K, dis-tribution - 506Q, fossil fuels - 500, methods in elasticity - 250G, nuclear

methods in elasticity - 2500, inchesi - 502, ocean - 5061, solar - 5068, D,F, storage - 506N, wind - 5061 ngineering., applied meteorology -458P, human factors - 552B, rehabili-tation - 552F, reservoir - 452K, oil and gas - 500E

engines (see also motors), prime movers and propulsion - 418

environment - VIII environmental:, conditioning and con-trol - 410I, embrittlement, fracture processes - 274G, mechanics - 514, tunnels, flow measurements - 384Q environments (extreme), materials testing in - 280R

equilibrium (chemical), flow stability - 370H

equipment (sports) - 552K ergonomics - 552B

rosion:, fracture processes - 274l, hy-draulics - 352M, soil, environmental fluid soil mechanics, applied - 268F estimation, systems theory - 200E estuaries, hydraulics - 352O Euler equations, theory - 356A

evaporation, two-phase convective, heat transfer - 404O excavation: rock - 270L, soil - 2681

exchangers (heat):, containment structures - 290D, recuperators - 410B, regenerators - 410C exhaust emissions - 416G

excitation:, turbomachinery blades -166J, vibrations in solids:, random -152D, transient - 152F expansion waves in compressible fluids

164B expansive clays, basic soil mechanics - 266F

experimental methods and techniques (letter category "Z"):, acoustics -172Z, aerodynamics - 378Z, astronautics, celestial, orbital mechanics -168Z, ballistics - 170Z, beams -258Z, biomechanics - 550Z, buckling - 262Z, cables, ropes, beams - 258Z, celestial mechanics - 168Z, combustion - 416Z, composite materials - 256Z, conduction - 406Z, control of 2-02, conduction - 4062, control of experiments - 2002, 384V, convection, one phase - 402Z, convection, two phase - 404Z, data reduction - 200Z, design of experiment -, 200Z, 384V, dynamics - 150Z, damage processes - 274Z, earthquake meprocesses - 2/4Z, cartinquake me-chanics - 466Z, electromagneto solid , mechanics - 264Z, environmental , mechanics - 514Z, explosions and ballistics - 170Z, flow, compressible -356Z, electromagneto fluid - 374Z, free shear layers - 368Z, incompressible - 354Z, internal (inlets, nozzles, diffusers, cascades) - 366Z, internal (pipe, channel, Couette) - 364Z, multiphase - 360Z, rarified - 358Z, stability - 370Z, turbulent - 372Z, wall layers 362Z, fluid flow measurements, and visualization - 384, fracture processes - 274Z, fracture mechanics - 276Z, friction and wear 292Z, geomechanics - 454Z, heat transfer - , 402Z, 404Z, 406Z, 408Z, hydraulics - 352Z, hydrology - 458F, impact on solids - 160Z, input parameters, synthesis - 200Z, kinematics, dynamics - 150Z, lubrication -

382Z, machinery fluid, dynamics - 380Z, mass transfer - 414Z, materials

testing - 280, membranes - 260Z,

meteorology - 458Z, naval hydrome-chanics - 376Z, oceanology - 458F, orbital mechanics - 168Z, parameters, input, synthesis of - 200Z, plasticity, viscoplasticity - 254Z, plates, shells, membranes - 260Z, porous media -452Z, radiation, heat transfer - 408Z, reduction of data - 200Z, rheology -350Z, robotics - 206Z, rock mechan-ics - 270Z, ropes - 258Z, shells -260Z, soil mechanics: applied -260Z, soil mechanics: applied -268Z, basic - 266Z, solid-fluid interactions - 166Z, stress analysis 280, structures, basic - 282Z, stability (buckling) - 262Z, vibrations - 156Z, vibrations of elements - 154Z. synthesis of input, parameters 200Z, system analysis - 200Z, thermomechanics, of solids - 412Z, vibrations of solids - 152Z, structural elements - 154Z, structures - 156Z, viscoelasticity - 252Z, viscoplasticity 254Z, wave: motions in solids 158Z, compressible fluids - 164Z, incompressible fluids - 162Z, wear -292Z experimental systems, analysis - 200Z expert systems, systems and control - 204K

exploding wires, spark gaps - 170 explorations, geomechanics - 454Z explosion - 170A,C,P explosions and ballistics - 170

explosive loading, impact on solids -160C extended surfaces, heat transfer devices

-410D external flow:, convection - forced -402B, natural 402D, peak heat flux, flow boiling - 404H, nucleate flow boiling - 404E, solid fluid interactions - 166C, solid boundary, stability - 370C

extinction, flame and fire - 416S extreme environments, materials testing - 280R

extrusion, materials processing - 272D

factors:, (human) engineering - 552B (view) radiation heat, transfer - 408B failure detection, isolation - 204R failure mechanisms, rock mechanics

fanjet engines - 418I fans, machinery fluid, dynamics -

380H-K Fast Fourier Transforms - 106D

fastening - 298

fatigue:, contact, friction and wear - 292E, fracture mechanics - 274E,F,G, 292E, fracture mechanics - 2/4E, fv corrosion - 274H, repeated loading, materials testing - 280H, thermal, thermomechanics of , solids - 412H fault diagnosis - 204R FDM, finite difference methods - 104

FEM, finite element methods - 102 fiber reinforced, composites - 256D,F field, electric:, effect on convective heat

transfer - 404S, flow in - 374E, electromagnetic, elastic, stability of solids in - 264F, magnetic, flow in -374D, testing, applied soil, mechanics - 268Z, geomechanics - 454Z

film, boiling, convective heat transfer: flow - 404J, pool - 404I, lubrication 382H, thin, waves in, incompressible fluid - 162D

filtering:, multiphase flow - 360l, techniques:, control systems - 202H, systems theory - 200G

finite:, amplitude waves in , incomnite;, amplitude waves in, incompressible fluids - 162C, deformation;, cables, ropes, beams - 258B, elasticity - 250C, plasticity - 254C, plates, shells, membranes - 260B, structural stability, buckling - 262B, viscoelasticity - 252C, viscoplasticity - 254C, difference methods, (FDM) - 104, element methods (FEM) - 102 fire: modeling - 416T, spread and ex-tinction - 416S fixed offshore structures - 286D

flame, flammability - 416 flexible tanks and containers, solid fluid

interactions - 166H flexural loading, materials testing -

flexure of plates - 260C

flight loads, aeroelastic effects on -166T

flight path, aerodynamics - 378J flight tests, aerodynamics - 3780 floors, structural mechanics - 284J flow: aerodynamic - 378, biomechani-cal - 550l, boundary layers - 362, compressible - 365, waves - 164, convection: one-phase - 402, two-phase - 404, combined modes - 408, with diffusion - 414E, electromagne-to-fluid - 374, free shear layers - 368, hydraulics - 352, hydrology - 458B-F incompressible - 356, waves - 162, internal:, pipe, channel, Couette -364, inlets, nozzles, diffusers, cas-

cades - 366, lubricating - 382, (in) machinery - 380, measurement - 384, meteorology - 458G-Z, multiphase - 360, oceanography - 458B-F, plasma - 374, plastic, materials testin 280L, (in) porous media - 452, rari-fied - 368, rheology - 350, shear lay-ers, free - 368, solid fluid interactions - 166, solid particles, micromeritics -450, stability - 370, turbulent - 372, visualization - 384, wal! layers - 362 fluid, fluids:, biomechanics - 550l,

compressible - 365, waves - 164, convection: one-phase - 402, two-phase - 404, combined modes - 408, with diffusion - 414E, distribution systems - 506Q, electromagneto-fluid - 374, finite difference, methods -104C, finite element methods - 102G, fuels - 416Q, hydrology - 458B-F, in-compressible - 356, waves - 162, mechanics - V, mechanics applications, of FEM - 102G, meteorology - 458Gof FEM 1020, meteorology 4380-2, non-Newtonian, in porous media 452M, oceanography - 458B-F, oil - 500D-E, plasma - 374, porous media - 452, solid fluid interactions - 166, storage systems - 506N, working,

prime movers and , propulsion systems - 418M

fluid-filled solids:, dynamics - 452H, elastic behavior - 452G, sloshing -162C fluidic control systems - 204F

fluidized beds, porous media - 452F flutter, solid fluid interaction - 166N flux (heat):, minimum, pool boiling -404D, peak, pool boiling - 404C, peak, (external) flow boiling - 404H, (internal) flow boiling - 404G

FMS, flexible manufacturing systems -208E foam structures - 282K foam, multiphase flows - 360G

force, measurement in flow - 384D forced convection, heat transfer:, external - 402B, internal - 402C combined with natural - 402G forging, materials processing - 272C forming, materials processing -272G,K

fossil fuels - 500

foundations:, beams on, mechanics -258G, deep, applied, soil mechanics - 268C, machine, applied, soil me-chanics - 268D, mechanics, of - I, plates and shells on - 260H, shallow, applied, soil mechanics - 268B, vibrations of - 156B, vibrations of structural elements on - 1540

fractals, nonlinear dynamics - 150K fracture:, impact on solids - 160F, me-chanics - 276, nuclear sytems - 502D, processes - 274, toughness, materials testing - 280M

framed structures, stability - 262G frames:, ground structures - 284E, vibrations - 154L

free:, molecular flow - 358D, piston and wave engines - 418F, shear layers - 368, in turbulence - 372F, surface flow, compressible fluids - 356R, incompressible fluids - 354J, stability - 370P

freezing, heat conduction - 4061, devices and systems - 410G fretting, fracture processes - 274I friction:, and wear - 292, internal (damping) - 152F, pipe losses, hy-draulics - 352D, skin, measurement -

fronts (contact), waves in compressible fluids - 164D frost, soil mechanics - 266L froth, multiphase flows - 360G fuel: fossil - 500, combustion: solid -

416P, liquid - 416Q furnaces - 416N fuzzy systems - 2000

gages (strain), stress analysis - 280W Galerkin computational, methods -

games (differential), control systems - 202H

gas: drilling mechanics - 500D, flow -358, liquified, transport - 506Q, lu-bricants - 382F, reservoir engineerin - 500E, solid, liquid mixtures - 360H, sound waves in - 172D, thermodynamic, properties - 400L, turbines:, fluid dynamics - 380D, prime movers, propulsion systems - 418G gaskets - 294I

gates, hydraulics - 352H gears: lubrication - 382L, machine elements - 294G, rotary compressors, pumps, fluid dynamics - 380Q generation of sound:, by flow - 172C, by moving surfaces - 172B geological criteria, earthquake mechan-

ics - 456D

geomechanics - 454 geometric:, pipe losses, hydraulics -352D, properties, solid particles -450B

geomorphology - 454B eophysical aspects of fossil fuels - 500B geotextiles - 268L

geothermal energy, systems - 506H glaciology - 454H glasses:, composite materials - 256T. materials processing - 272T granular media:, heat conduction 406G, mechanics, micromeritics 450, wave motions in solids - 158M gravity (low), flow in - 354P

gravity waves, incompressible fluids - 162D gravity, geomechanics - 4541 grid development, finite difference methods - 104E

grillages - 284J grinding:, materials processing - 2721, micromeritics - 450D, rock mechanics - 270K, solid fossil fuels - 500F ground:, motion, earthquakes - 4560 structures, mechanics - 284, vehicles

mechanics - 288B guidance:, astronautics - 168K, robotics - 204F, systems and control applica-tions - 204B

guide vanes, machinery fluid dynamics - 380M

guns, explosions - 170L gusts, solid fluid interactions - 166R gyrodynamics - 150I

hammer (water) in pipes, - 162J harbors, hydraulics - 352P hardening, work:, plasticity, viscoplas-ticity - 254G, materials processing hardness, materials testing - 280N

hardware (computer):, computational methods - 106K, systems and control applications - 2041

hazardous waste, containment, disposal - 514H

- 514H heat:, addition, boundary layers - 362Q, free shear layers - 368K, internal flow - 364l, 366K, turbulent flow - 372L, wall layers - 362Q, exchangers, structural mechanics - 290D, transfer - VI, biomechanics - 550L, conduc-tion - 406, devices - 410, electromag-ret of vid. 374H convertion 402 neto-fluid - 374H, convection - 402neto-fluid - 3/4H, convection - 402-408, 414, fossil fuels - 500H, geome-chanics - 454F, hydrology - 458D, meteorology - 458L, oceanography -458D, plasma - 374H, porous media 452I, radiation - 408, solar systems -506D, systems - 410, thermodynam-ics - 400A, turbulent flow - 372L earing solar systems - 506D

heating, solar systems - 506D helicopter rotors - 380R helicopters - 288F heterogeneous , combustion - 416L, ignition - 416C highlift methods, aerodynamics - 378C highways, applied soil mechanics -268J

hoisting devices, machine elements - 294M holographic techniques, stress analysis - 280R

homogeneous:, turbulence - 372B honeycomb structures - 282K human factors - 552B hybrid, computational methods - 106E

NDT (nondestructive testing or techniques) - 280R-U NM (numerial machining) - 272H

noise control - 172J noise reduction - 172J non-Newtonian fluids:, flow stability -

370G, heat convection - 402L, in-compressible flow - 354R, internal flow - 364M, 366H, porous media 452M, rheology - 350D, turbulence -372K, wall (boundary) layers - 362K destructive testing or techniques 280R,S,T,U

nonequilibrium effects in: orequationum effects in:, compressible flow - 356K, free shear layers - 368L, flow stability - 370H, internal flow - 364G, 366E, turbulence - 372O, wall (boundary) layers - 362T

omogeneous media:, elasticity 2501, fracture mechanics - 276G, plasticity - 254K, rock mechanics -270F, sound waves - 172G, viscoe-lasticity - 252K, viscoplasticity -254K, wave motions in solids - 158L

nonhomogeneous beams, mechanics -258

nonisotropic (see anisotropic) nonlinear:, dynamics - 150K, materials:, elastic - 250C, viscoelastic naterials; elastic - 250c, viscoelastic - 254C, theory and problems-, cables, ropes, beams - 258B, flow stability - 370D, elastic fracture, mechanics - 276C, elasticity - 250C, heat conduction -406D, control systems - 202C,

plasticity - 254C, plates, shells, membranes - 260B, solid fluid interactions - 166B, structural stability, buckling - 262B, structures (basic) - 282F, systems - 200M, thermoelasticity - 412D, viscoelasticity - 252C, viscoplasticity - 254C, waves in solids - 158G, fluids - 162C

nonuniform beams - 258K nviscous flow, incompressible -354C

normal stresses(2nd order) in rheology -350G

nozzles: hydraulics - 352H, internal flow - 366

nuclear: power - 418K, systems - 502 nucleate:, flow boiling (external) -404E, pool boiling - 404B numerical, control systems - 204G, machining - 272H

### О

observability, systems theory - 200B obstructions:, hydraulics - 352G, inter-nal flow - 364P, 366M ocean structures - 286, solid fluid interactions - 166K oceanography, -ology - 458C-F offshore structures - 286D-E oil and gas:, drilling mechanic s - 500D, reservoir engineering - 500E open channels:, flow, hydraulics 352C, waves in fluids - 162J open loop control systems - 202H operator performance - 552B optical techniques:, flow measurement and, visualization - 384M, stress analysis, NDT - 280R optimal control systems - 202 optimization; control systems - 202B, machine design - 296E, performance of internal flow through inlets, noz-zles, diffusers, cascades - 366N, structural - 282C, trajectory, astronautics - 168K orbital mechanics - 168G organs, biomechanics - 550F orifices, hydraulics - 352H orthotics, rehabilitation engineering -552F oxidation, combustion - 416R oxidizers - 416R

### P

packings, particles, micromeritics - 450H

Pade approximant, computational methods - 106E

parachutes - 288J parameter (distributed) systems:, sys-

tems theory - 200O, control systems -202E participating media, radiative heat transfer - 408E

particle kinematics - 150B, dynamics -150D

particles:, mixtures multiphase, flows -360B, 360H, micromeritics - 450 particulate composite, material me-chanics - 256B

path (flight), aerodynamics - 378J pattern recognition, systems theory -

peak heat flux:, flow boiling (external)

404H, flow boiling (internal) - 404G, pool boiling - 404C endant drops, flow stability - 370I performance:, aerodynamics - 378I, internal flow (inlets, nozzles, diffusers, cascades) - 366N, operator, human factors - 552B, prime movers and , propulsion systems - 418C, ship, na-val hydromechanics - 376C

permafrost, soil mechanics - 266L erturbation computational methods -

perturbations, orbital, celestial mechan ics - 168D

phase, movement, soil - 266D, change:, heat conduction - 4061, of solids un-der thermal, stress - 412K, one-phase convection 402, two-phase convec-

photoelasticity, stress analysis - 280R photonic propulsion - 418L photoplasticity, stress analysis - 280R photoviscoelasticity, stress analysis -

physical:, explosion - 170C, phenomena, modeling - 100D, oceanography - 458C, theory:, plasticity - 254M, viscoelasticity - 252H, viscoplasticity - 254M

piezoelectricity, electromagneto solid mechanics - 264E

piles, applied soil mechanics - 268C pipe, pipes, piping:, containment struc-tures - 2901, fluid flow in, solid fluid tures - 2901, fluid flow in, solid fluid interactions - 1661, internal flow in -364, turbulence - 372H, heat transfer devices - 410F, losses, hydraulics -352D, structural stability, buckling -262J, waves in fluids - 162J

pipeline technology - 506Q piston (free) engines - 418F plasma dynamics - 374

plastic:, buckling of structures - 262N, flow, materials testing - 280L, waves in solids - 158H

plasticity - 254, fracture mechanics -276F, materials processing, applica-tions - 272B, soil mechanics - 266J, rock mechanics - 270D

plastics:, composite materials - 256V, materials processing - 272V plates - 260, elastic, waves in solids -

158C, structural stability - 262H, vi-brations - 154G, thick plates - 154l platforms, offshore - 286D-E plumes, free shear layers, fluid me-

chanics - 368 pneumatic:, mechanisms, machine elements - 294L, systems and control

pollutants in , porous media - 452C ponds, solar - 506F pool boiling - 404B-D, 4041

pore pressure, soil mechanics - 266D porous:, media - 452, heat conduction 406G, heat convection - 402S, 404V, mass transfer - 414I, sound waves in 172G, wave motions in solid - 158M, walls, internal flow with - 3640

position applications, of robotics 206G

positive displacement machines or engines:, fluid dynamics - 380T, proulsion systems, prime movers pulsic 418E

postbuckling, structural stability - 262 powder metallurgy, materials processing - 272N

power systems:, control - 204E, nuclear - 418K

prediction of earthquakes - 454E pressure:, lateral earth, soil mechanics 268H, measurements in flow - 384E, particle packings, micromeritics -450H, pore, soil mechanics - 166D structural components, under - 290J, vessels - 290B, structural stability, buckling - 262J, under external, pressure - 290H prestressed concrete - 2821

prime movers:, propulsion systems -418, robotics 206C

probabilistic design, of structures -282F process control systems - 204D process design, manufacturing - 208B processes, fracture - 274

processing, materials - 272 product design, manufacturing - 208B propellers:, flutter, solid fluid interaction - 166N, in air, machinery, fluid dynamics - 380R, in liquids, machinery, fluid dynamics - 380F

propulsion: electromagneto fluid dy-namics - 374M, ship - 376I, systems

prosthetics, rehabilitation - 552F

pumped hydro storage - 506N pumps - 380H-Q

### Q

quasi-steady thermoelasticity of solids -412B

radiation:, flame - 416M, heat transfer -408, nuclear, interaction with materi-als - 502H, railways, applied soil mechanics - 268J ramjets - 418J

random (see also stochastic):, vibration in solids - 152D, loading of structures 2821, media, sound waves in -172G, waves or media in solids -

rapid solidification, materials processing - 272P rarefied gas flow - 358 reactions (chemical) in:, compressible

flow - 356K, convective heat transfer - 402N, free shear layers - 368L, in-compressible flow - 354M, internal flow - 364G, 366E, mass transfer -414G, rheological flows - 350L, tur-bulence - 372O, wall (boundary) layers - 362T

reactor vessels, structure - 290B realizability, systems theory - 200B reattachment of wall (boundary) layers -362M, 366J

recognition (pattern), systems theory -200L

recoil in rheology - 350E recuperator, heat transfer devices -

reduction (of drag), wall or boundary layers - 362S reentry, orbital mechanics - 168P

reflection of waves:, acoustic way 172H, compressible fluids - 164F, in-compressible fluids - 162H, solids -

refraction of waves:, acoustic waves 172H, compressible fluids - 164F, in-compressible fluids - 162H, solids -158Q

regenerative turbomachinery, fluid dynamics - 380T

regenerators, heat transfer devices - 410C

rehabilitation engineering - 552F reinforced:, concrete:, structures (basic) - 282H, vessels, containment, struc-tures - 290G, (fiber) composite mate-rial, mechanics - 256D,F relaminarization:, internal flow

wall or boundary layers - 362E relaxation:, materials testing - 280K. stress:, rheology - 350E, viscoelasticity - 252G

reliability design:, machines - 2961, structural mechanics - 282G rendezvous, astrodynamics - 168P repeated loading (fatigue), materials testing- 280H

reservoir engineering - 452K, oil and gas - 500E residual stresses:, elasticity - 250K,

materials processing - 272L, meas-urement - 280, plasticity, viscoplasticity - 254L

resistance:, contact, heat conduction -406E, ship - 376C retardation of cracks in fracture mechanics - 276K

Reynolds number (low), incompress-ible flow - 354F rheological properties of , soils - 2661 rheology - 350 rigid body: kinematics - 150B, dynam-

ics - 150D rings: mechanics - 258L, structural

stability, buckling - 262F, vibrations - 154D robotics - 206

robustness, systems theory, design -200D rock mechanics - 270, geothermal systems - 504D

rocket motors - 418H rods: vibrations - 154B, wave motions in solids - 158B rolling, materials processing roofs, ground structures - 284J

roots, machinery fluid, dynamics -380Q ropes: mechanics - 258, vibrations -154C

rotary compressors and pumps - 380Q rotating; discs, blades, shells - 260K, flows, compressible - 356M, flows, incompressible - 354K, waves - 162K, flows, stability - 370K, fluids or surfaces; convection - 402l, free shear layers - 368H, internal flow 364K, turbulence 372J, wall (boundary) layers - 362P, machines, turbomachinery, vibrations - 156M, shafts: mechanics - 258M, vibrations

rotational (nonviscous) flow, incompressible - 354C

- 154K

pressible - 354C rotor, blading, machinery fluid, dy-namics - 380L, flutter, solid fluid in-teractions - 166N, helicopter, ma-chinery, fluid dynamics - 380R roughness of surfaces, wall layers,

fluid dynamics - 362O:, internal flows - 364N rubbers:, composite materials - 256V, materials processing - 272V runways, applied soil mechanics - 268J

salinity, ocean energy systems - 506J sampling, applied soil mechanics -268Z

sand liquefaction, basic soil mechanics - 266H

sandwich:, materials, vibrations of, structural elements - 154M, plates mechanics - 260G, structures (basic)

scattering:, acoustic waves - 172H, (inverse) transforms, computational methods - 162H, waves in , compressible fluids - 164F, waves in , incompressible fluids - 162H, waves

in solids - 158Q scouring, hydraulics - 352M screws, machinery hydrodynamics -380Q

seals, machine elements - 2941 second order stresses, rheology - 350G secondary flow:, internal - 364R, 366G sediment transport, hydraulics - 352M seepage, porous media - 452C seismic hydrodynamics, earthquake mechanics - 456H

seismicity, earthquake mechanics -

seismology, geomechanics - 454D semi-infinite elastic media, wave motions in - 158D

sensitivity:, structural stability, buck-ling - 262D, systems theory - 200F sensors:, robotics - 206F, systems and control - 204H

separated flows: , convective heat trans-fer - 402H, internal - 366J, wall (boundary) layers - 362M settlement, basic soil mechanics -

shafts, rotating, mechanics - 258M, vi-brations - 154K

shakedown, limit design of structures -

282B shallow foundations, applied soil mechanics - 268B

shear:, layers (free) - 368, turbulent - 372F, loading, materials testing -

280F sheet metal forming - 272G shells:, mechanics - 260, structural stability, buckling - 2621, vibrations - 154H, 154I, wave motions in solids

shielding from noise - 172J ships:, mobile structures - 288C, naval hydromechanics - 376, structural vi-

brations - 156H shock:, biomechanics - 550K, boundary layer, interaction - 362G, thermal, in solids - 412G, tubes and tunnels -384Q, waves in fluids - 164D, viscidinviscid, interaction - 164D silos, containment structures - 290K

sinulation; earthquake mechanics -456J, systems theory, design - 2001 singularities; elasticity - 250E, plastic-ity, viscoplasticity - 254D skeletal biomechanics - 550B

skin friction, flow measurements 384D

slamming of ships, naval hydrome-chanics - 376C slip (transition) flow, rarified flow - 358C

sloshing of liquids, in containers - 166D

slurries, multiphase flow - 360B smart structures - 282D snow: mechanics - 514F, motion

software, computational:, finite element methods - 102L, finite difference, methods - 104E, other computational, methods - 106I, systems and control 204K soil mechanics: basic - 266, applied

268 soil-structure interaction, earthquakes -

456E

solar energy systems - 506B,D,F soldering - 298C solid mechanics - IV

solid, boundary, flow stability - 370B-C, film lubricants - 382H, fluid interc, tim ubricans - 362h, fluid inter-actions - 166, convection - 404R, fossil fuel problems - 500F,G, fuels, combustion - 416P, impact on - 160, micromeritics - 450, particles: in multiphase , flows - 360B, 360H, micromeritics - 450, porous media -452, sound waves in - 172F, ther-momechanics of - 412, vibrations (basic) - 152, wave motions in - 158

solidification (rapid), materials processing - 272P solitary waves in incompressible fluids - 162C

sonic boom - 164D sound - 172

space: heating: , devices, systems - 410, by solar systems - 506D, vehicles, satellites - 2881, structural vibrations - 156J

spacestations, vibrations - 156J, as structures - 288I

spallation:, impact on solids - 160F, fracture processes - 274K spark gaps, explosions - 170C special perturbations, celestial mechan-ics - 168D

spillways, ground structures - 284C spinal trauma, biomechanics - 550J sports mechanics - 552K spray flow, multiphase flow - 360G spreading of fire, flame - 416S

springs:, machine elements - 294D, vibrations - 154E stability:, a-rodynamics - 378K, aeroelastic effect on, solid fluid interac-

tions - 166T, applied soil mechanics -268F, stabilization - 268L, attitude, orbital, astronautics - 168K, celectial mechanics - 168K, crack, fracture mechanics - 276H, elastic, in, electromagnetic fields - 264F, flame (and stabilization) - 416F, flow - 370, po-rous media - 452E, machinery fluid, dynamics - 380C, motion, dynamics - 150H, orbital mechanics - 168K, ships - 376G, structural, buckling -262, systems theory, design - 200D, thermomechanics of , solids - 412H, 416F, 452L stall, aerodynamics - 378G

stamping, materials processing - 272G static:, aeroelasticity, solid fluid, interactions - 166T, vapor condensation, con, vective heat transfer - 404M statics of solid particles, micromeritics -

statistical:, mechanics - 400E, theory of rheology - 350C

stator vanes, machinery fluid mechanics - 380M

steady:, heat conduction - 406B, inter-nal flow - 366B, thermoelasticity -412B

steam engines, turbines - 418D stiffened:, plates and shells - 260G, structures, stability, buckling - 262K stilling basins, hydraulics- 352K

stic effects, (see also random) computational mechanics 106F, fracture processes - 274X, systems theory, design - 200Q, control sys-tems, 202F, vibrations of solids -152D

storage, (energy) systems - 506N, haz-ardous waste - 514H, thermal - 410L storms - 458K

strain gages, stress analysis - 280W strain life bases analysis of fatigue -274F

stratified flow; free shear layers - 368F, hydraulics - 352F, incompressible fluids - 354J, waves - 162L, internal - 364J, stability - 370J, turbulent - 372J

strengthening, rock mechanics - 2701 stress:, analysis of fatigue - 274F, analysis (experimental) - 280, analysis of magnets - 264C, concentra-tions:, elastic - 250E, plastic, visco-plastic - 254D, corrosion, fracture plastic - 254D, corrosion, fracture - 274F, instrumentation - 280T, intensity factor, calculations - 276D, normal, second order, rheology - 350G, relaxation - 252G, materials testing - 280K, rheology - 350E, residual:, elastic - 250K, materials processing 272L, plastic, viscoplastic - 254L, rock mechanics - 270H, thermal. solids with phase, change - 412K rings:, mechanics - 258C, vibrations strings:, mech

of structural elements - 154C strong ground motion, earthquakes - 456C

vehicles:, aerospace, systems and con-trol - 204C, ground - 288B, space, satellites - 288I, structural vibrations

velocity measurement, in flow - 384B vessels, pressure:, containment, struc-tures - 290B, 290E-H, structural sta-

tures - 290B, 290B-H, structural sta-bility, buckling - 262J vibration and dynamics - II, biomechan-ics - 550K, nuclear systems - 502B vibrations in , compressible fluids -164A, incompressible fluids - 162A

view factors, radiative heat transfer -408B

viscoelastic - 252, fracture mechanics - 276E, rock mechanics - 270D, soil mechanics (basic) - 266J, structural

stability, buckling - 262M, waves in solids - 1581 viscoplastic - 254, media - 254I, soil mechanics (basic) - 266J, waves in solids - 158H viscoplastic (solume), theology, 250F

viscosity:, (volume), rheology - 350F, flow measurement and visualization -3841

viscous flow:, compressible - 356G, in-compressible - 354D visualization of flow - 384

volume viscosity, rheology - 350F vortices:, compressible fluids - 356F, flow stability - 370M, incompressible fluids - 354C

vorticity measurements - 384J vulcanology, geomechanics - 454G

### W-Z

wakes, free shear layers - 368 wall (boundary layers) - 362 walls (porous), internal flow - 364O waste (hazardous), containment and disposal - 514H

water:, dispersion, environment - 514E, hammer, waves in , incompressible fluids - 162J, tunnels, flow meas-urements - 384Q

waterways, hydraulics - 352N waterways, hydraulis - 322/N waves; acoustics - 172, compressible fluids - 164, electromagneto fluids -374A, flexible structures, interaction with - 166F, incompressible fluids -162, loads on hydraulic, structures -352J, machines, engines:, fluid dy-namics - 380T, prime movers - 418F, motions in solids - 158, oceanography - 458C, in plasmas - 374A, shock, interaction with, boundary

layer - 362G, sound - 172, thermal, propagation - 412I wear -292, fracture processes - 274I,

materiais testing - 280O welding - 298C whipping, ship dynamics - 376C wind:, energy systems - 506J, tunnels -384Q materials testing - 280O

wing body combinations, aerodynamics - 378D

wings, aerodynamics - 378B wires: exploding - 170C, mechanics -258C

wirewound vessels, containment structures - 290F

work hardening, plasticity - 254G working:, fluids, prime movers and, propulsion systems - 418M, (metal) lubricants 382H

wrapping, composite materials processing - 272M
x-ray techniques of stress analysis 280R
